Sponge Products

Plain & adhesive backed sponge products can be supplied in sheet, strip & cut shapes.

We stock a range of commonly used sizes in SAB Neoprene sponge for general lid / door seals & some in white EPDM sponge for use in the food industry.

Sponge products are available in a range of rubbers, densities & colours.

Cut gaskets can be supplied individually or if small size & high quantity, kiss cut on rolls for easy handling.

Foam products can be converted by CNC routing, die stamping, moulding, turning & fabricating to produce items such as:- Case liners, rollers, buffers, protectors, sleeves, seals....

Filtration Products

The foam range extends into reticulated Polyurethane which is used for filtering. Supplied in sheet form or converted shapes for block or sleeve filters.

We also supply a limited range of filtration products such as synthetic media sheet and needlefelt.
