- Minimum order 5000.

Invisible bacteria, viruses and microbes are passed by unclean hands not in the air. The common cold virus, influenza, and superbugs such as MRSA are passed this way.

Just think how many of us eat something after handling money or filling up at a petrol station. How many of us are reluctant to use public lavatories.

biomedical

Alcohol 'Waterless' Hand Sanitisers help kill more germs and improve patient safety.

Hands spread infection and germs, regular use of alcohol based hand sanitisers can help reduce hand bacteria counts by up to 99.99%.

The use of Alcohol based Hand Sanitisers is being promoted in the health care industry because they are more effective than hand washing with traditional soap as alcohol kills rather than removes micro-organisms.

- Alcohol Hand Sanitisers can also be used around the home, office or whilst travelling.
- Easy to use anywhere anytime to ensure your health and well being.
- Complies with British Standard EN1500.
