

The **Construction Risk Assessments** software package has been specifically designed to assist organisations working in the construction industry to comply with their duties under **UK Health & Safety Legislation**. The software offers over 140 pages of comprehensive guidance/information and completed risk assessments, all of which have been professionally prepared by experts in both health and safety and construction. The software includes:

- General information and background data on why risk assessments are required; the legal requirements; when, how and who should carry out risk assessments
- Blank risk assessment forms for subsequent completion by the software user
- Over 60 completed risk assessments for key construction activities
- The completed risk assessments are grouped into 3 categories: General Construction Activities; Use of Plant, Tools and Other Equipment, and Working at Height
- Each assessment assesses the risk, specifies control measures and provides reference to additional guidance information

**Who is the software for?**

The **Construction Risk Assessments** software package has been specifically designed for all types of organisation, from the self employed to multi-national organisations such as:

- Builders/Civil Engineering Contractors
- Groundworkers/Demolition Contractors
- Scaffolders/Roofing Contractors
- Electricians/Plumbers/Mechanical Engineers
- Shop Fitters/Painters & Decorators
- Architects/Engineers/Surveyors etc.

The top section of the form is used to provide details about the project and when the assessment was prepared
