# CCTV Systems

We deliver the 'Total Surveillance Solution'. We install and maintain a comprehensive range of internal and external CCTV solutions, which span the entire spectrum of your premises from small offices to the largest industrial complexes. We have extensive experience in retail, commercial and industrial premises and our engineers are specialists at working in hazardous areas, such as oil refineries, petrochemical plants, steel mills and other extreme environments.

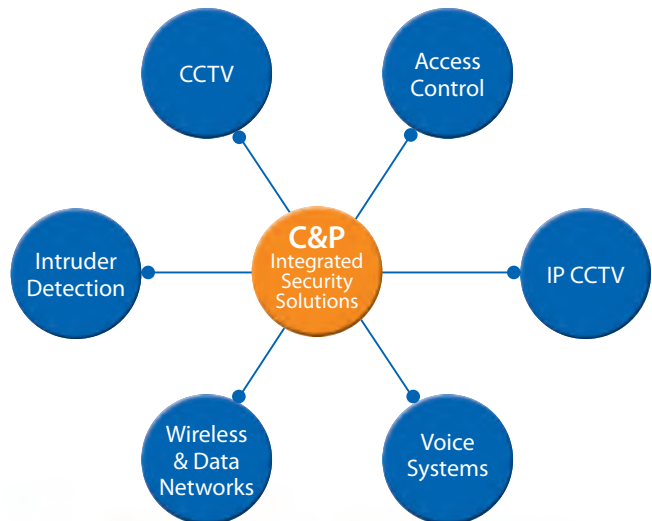

## Our CCTV Services include:

- Analogue and IP systems
- Design and consultancy
- Digital recording
- External P.I.R detection
- Fixed and high speed dome (PTZ – pan, tilt, zoom) cameras
- Installation services
- Voice systems integrated to CCTV equipment (which can be viewed and operated over a broadband or 3G from home, a remote office or a professional remote monitoring centre.)
- Intruder detection
- Preventative and planned maintenance
- Project management
- Remote monitoring
- Site surveys
- Wireless systems
- Hazardous Areas

## Integration

Although many of our installations are standalone, we pride ourselves on being able to offer solutions that seamlessly integrate many of our product areas. For example, access control systems and intruder systems that integrate with CCTV systems with common management platforms.

*"Securing a Safer Environment for your organisation."*
