Our Service

- We offer high-quality products and services, an impeccable safety record and deliver engineering excellence through our highly experienced employees who are committed, reliable and professional. We can work with you to provide anything from basic support services to full turn-key solutions.
- We approach every project with a goal to succeed and perform to plan. Our focus is to build long-term strategic partnerships and we are firmly committed to achieving customer satisfaction through our quality, safety, professionalism, reliability and project deliverability.
- All our site employees have a valid **Client Contractor National Safety Group (CCNSG) Safety Passport** and the majority have completed **Hazardous Area (CompEx) Training**. They are also accustomed to working in a wide range of environments, often hostile and extreme.
- Our customers are reassured of safety and compliance due to our stringent health and safety working ethos, practises, quality systems and award winning safety record.
- We have been **Assessed and Certified** by the **NIC EIC (National Inspection Council for Electrical Installation Contractors)** as having the technical capability to carry out electrical work in:
 - (a) Accordance with BS 7671: 2008 IEE Wiring Regulations for Electrical Installations.
 - (b) Areas where potentially explosive atmospheres may be expected to occur in the form of explosive gases, vapours or combustibile dusts.
- We provide engineering solutions from design to start up through to on-going maintenance. Our proactive company ethos and ability to integrate with your operations at task level ensures your project is completed on time and within budget.

"We practice a customer-centric philosophy, always striving to exceed our customer's expectations."
