

FACTORY & MACHINE MOVING

www.trojanmek.co.uk

BorgWarner Automotive

Port Talbot

Scope of Project:

Decommissioning of production lines, plant and equipment, during and subsequent to the closure of the Kenfig Industrial Estate Factory.

This involved working closely with BorgWarner's production and engineering personnel to disconnect, match-mark machinery for re-installation at new sites.

Also to remove machines from the factory, load to transport and ship to sister companies, both within Europe and also in the Far East.

The total value of the project to Trojan Mek was approximately £250,000.
