QuietCall IQ AIO

Patient Paging System

QuietCall IQ All in One offers patients the freedom to move away from congested waiting rooms and relax in a more convenient area with a tea or coffee, patients can be called at the press of a button ensuring they are notified the moment they are required to return to be seen. QuietCall Patient Pagers are manufactured using antimicrobial plastics helping reduce the spread of infectious diseases.

The QuietCall All in One transmitter and charger is a space saving combined transmitter & charger which simple to operate and holds up to 15 QuietCall pagers, QuietCall transmitters have a range of up to two miles and with the option to extend the coverage with our repeater system QuietCall covers even the largest hospitals.

Renumber QuietCall IQ Pagers at the touch of a button. No more duplicate numbers or confusing reordering. QuietCall Pagers can be moved from one departments system to another and renumbered at the touch of a button.
