

● Plug & Play Auto-Bypass Switches

APS Auto-Bypass 16A
Wall-Mounted Version

The APS Auto-Bypass switch allows a UPS to be powered down and removed from service without disruption to the connected load(s)

It has both manual and automatic transfer functions and is *available in sizes up to 3kVA*

If the UPS is accidentally disconnected or fails, any load(s) connected to the APS Auto-Bypass are automatically transferred to the mains supply

Rear Panel 16A
Rack-Mounted Version

As well as the Wall-Mounted version, the APS Auto-Bypass is also available as a 19" Rack-Mounted solution.

Either option available in 1, 2 or 3kVA ratings (single phase)

Standard on all options: -

Back-feed protection, manual and automatic bypass functions, mains present LED

Adept Power Solutions supplies a wide range of external maintenance bypasses and switchgear for UPS.
