

BeaconMedæS showcases new products at Arab Health 2015

BeaconMedæS, part of the Atlas Copco Group, will feature the new TotalAlert Infinity® alarm and GEM Shield Medical Gas Terminal Unit at Arab Health 2015.

Visit the BeaconMedæS booth 1H51 at the Arab Health 2015 Exhibition 26-29 January at the Dubai International Convention & Exhibition Center.

The new BeaconMedæS TotalAlert Infinity® alarm goes beyond any monitoring device of its kind, providing an emergency action plan to ensure patients' welfare is the top priority.

With the ability to display customized emergency instructions, the TotalAlert Infinity® notification system provides the right instruction, to the right person, at the right time, ensuring nursing staff know when equipment is safe to use and if patients need to be attended to.

“The New TotalAlert Infinity® alarm is the most exciting and innovative medical gas product we've launched since the Scroll Medical Air System,” said Jonathan Brooks, product manager for BeaconMedæS. “This notification system is a game changer for the medical gas solutions industry as it will truly become part of the hospital's emergency response strategy.”

The TotalAlert Infinity® alarm allows the monitoring of any device which can be equipped with 4-20 mA outputs.

With TotalAlert Infinity®, facilities can be assured that their staff will immediately know what to do in an emergency situation, offering complete peace of mind.

The next generation of medical gas terminal units, GEM Shield units are infused with an anti-microbial additive to help reduce cross infection.

A safety taggant enables the user to verify the unit includes the additive for complete satisfaction.

“With the anti-microbial additive, our GEM Shield Terminal Units meet needs even beyond what we provided with our trusted GEM 10 Installations,” said Andy Tudor, Atlas Copco Medical UK product development manager.

The GEM Shield units, designed to reduce installation and maintenance time, are easily retrofitted onto existing GEM 10 installations.

The BeaconMedæS Lifeline® manifold, designed to ensure fewer leaks with no NPT connections, will also be on display.
