

Boost Labcare

Total Laboratory Support

Featured Product: **The PhAST blue**

LED Photo-Activation equipment for PCR

See boostlabsales.co.uk for more details

UKAS Calibration and Validation

Boost Labcare are a UKAS accredited laboratory complying to ISO/IEC 17025: 2005 and our scope of accreditation covers temperature, pressure, time and rotational speed. We can conduct UKAS calibrations either at customer's onsite premises or in our dedicated permanent laboratory facilities. Our calibration services cover a wide range of equipment from digital thermometers through to autoclaves. If you have any queries regarding equipment calibration please contact us as we have a wealth of experience in this field and are happy to help. Routine calibrations can be built into a maintenance contract and we can calibrate a broad range of equipment in one visit, allowing us to offer competitive pricing by utilising our time effectively.

Maintenance Service Packages

Boost Labcare has been maintaining laboratory equipment for over 25 years and has a team of engineers covering the UK. We are dedicated service engineers for Rodwell, IUL, Biotool, Nuve and Interscience and are able to service and repair a wide range of other equipment. Our engineers have a thorough understanding of the importance of reliable, well maintained laboratory equipment.

Our comprehensive maintenance service contracts are arranged to suit your requirements. Boost Labcare can offer local, comprehensive and flexible service support for your laboratory and we are recognised by leading laboratory suppliers as being a reliable company to work with.

We aim to provide an effective approach and invite you to discuss any requirements you have.
