

Adaptive M2M - Contract-free Global Roaming Airtime

Imagine a single solution to keep your devices connected anywhere in the world, without the need to change the SIM card for each region. How about a system that works over multiple networks, giving you the best possible cellular coverage in the deployed area? What about only paying for the data you use? How about not having to be tied into a contract? Or the ability to add extra services that give you more control, insight and functionality over your devices and their data. Adaptive M2M bespoke IoT airtime packages offer this and much more.

SIMs are available in standard SIM, Micro SIM, Industrial SIM and embedded chip SIM form factors, while monitoring and control functionality, is made available through dedicated ePortals, allowing you to manage large global deployments of devices easily.

Full Package

Get all the benefits of the full suite of services, providing fully optimised cellular network, module management, location setting, automation and billing features.

AWARE

Make sure you're alerted to your SIM's usage including but not limited to voice, SMS, data usage, PDPs, geographical deployment and operator registration. Automatically trigger alerts and gain access to real-time connectivity monitoring & control functionalities through the online dashboard.

AUTOMATION

Set up and define customizable rules for automation of life-cycle management and device outages, helping you to only pay for connectivity when your devices are live and generating you revenues.

MODULE MANAGEMENT

Working on the device level of Telit modules, this service allows customers to gain remote access to a set of diagnostics and troubleshooting capabilities, giving you features such as remote module rebooting, module inventory management and network diagnostics.

OPTIMUS

Automatically optimises your plan, switching your SIMs' billing plan onto the most economical for your usage.

HERE

Use cell IDs to map your devices' locations without the need for GPS, be it indoors or outdoors, anywhere globally.

INTELLIGENCE

A dashboard offering operator grade analysis of your SIM estate's usage, billing, subscriptions' state, serviceability and invoicing.

Free trial SIMs and packages are available now, so email adaptivem2m@adaptivemodules.com or call +44 (0)1273 248977 to receive yours.
