

Floor Team Industrial specialises in all types of industrial floor renovation including:

- HTC Superfloor concrete grinding and polishing
- Dust-free shotblasting, diamond grinding and concrete planing
- Removal of oil contamination (HCA heat treatment)
- Tile and Vinyl removal
- Self-levelling cementitious pump applied screed systems
- Epoxy resin and polyurethane systems
- Anti-slip and dust control
- Resin decorative systems
- Resin injection
- Tanking and waterproofing
- Floor and joint repairs and renovation

Floor Team Industrial's client list is both extensive and impressive, reflection the companies commitment to quality and efficiency - projects can often be undertaken over a weekend period enabling refurbishment to be completed with minimal disruption - essential in busy production and distribution environments!
