

Calibration Facilities

In-House UKAS Facilities

Young Calibration offers UKAS accredited calibrations to ISO 17025 for gas flow, water flow, hydrocarbon flow, air velocity, pressure and electrical parameters. Located in West Sussex, the laboratory offers calibrations to clients throughout the globe.

The laboratory also holds UKAS Testing accreditation for the test and evaluation of heat exchangers for calorimetric performance.

Specialist services covering automotive test equipment, medical and HVAC are available with extensive service and repair facilities.

On – Site Facilities

A range of traceable calibration facilities are available throughout the UK covering the requirements for most general test and measurement equipment. A range of UKAS accredited calibrations are now offered for on-site pressure and electrical parameters.

- Automated Test Rigs
- Production Lines
- Tanks, Vessels, Levels
- Engine & Vehicle Test Cells
- Fuel systems
- Process Plants

Laboratory Facilities

Extensive capabilities exist within the laboratory to cover general-purpose test and measurement instrumentation. The company provides a tailor made service to suit the customers requirements from packaging, certification formats to contract management.

- Air Flow
- Oil Flow
- Water flow
- Temperature
- Pressure
- Humidity
- Electrical
- Mass
- Force
- Torque
- Dimensional
- Vibration
- Air Velocity
