

Quiet Call Networked Patient Call System

Transform patients waiting experience with Quiet Call Networked Systems

Quiet Call CP Networked patient call systems offer all the advantages of our Quiet Call Ultra system with the added advantage of network based call points and transmitters.

Quiet Call CP Networked is the ideal solution for locations requiring patient call systems in multiple departments.

Utilising our range of smart Quiet Call CP tablets and terminals Quiet Call CP offers a future proof solution with forward compatibility to the new range of WiFi smart pagers.

Quiet Call CP Networked systems provide message delivered notifications on screen to confirm patients have been called, this function is unique to Quiet Call CP Networked systems.

Quiet Call CP Networked systems can cover even the largest sites with no black spots or non call areas.

Smart WiFi Pagers are currently in development and with Quiet Call CP your system is forward compatible and ready to accommodate Smart WiFi pagers
