When you're ready to make your home safer, using a mobile scaffold tower service near you is one optimal option.

We offer various types depending on what works are needed and for how long they will need it! Discover them all by browsing through our selection today.

Scaffold towers are delivered right to your door with just a few clicks of your mouse. All you need is the space in your back garden, driveway, or work where you plan to build your scaffold tower. And best of all, it won't break the bank!

The huge range of aluminium scaffold towers available at Lakeside Hire is extensive, and all are maintained and checked for safety regularly. We provide a wide selection of alloy towers with safe working load capacity, including

- Single width.
- Double width.
- And the Mi Tower for single users.
- AGR (Advanced Guardrail Towers) Stairway Scaffold Towers.

Our scaffold collection is lightweight, simple to transport, and meets government requirements for safety and competence. ABC provides high-quality scaffolding towers ready for immediate usage so that you may rest confident in your decision.

## Our Tower Sizes

Towers are available in a number of sizes with built-in ladder, ranging from as little as 2-meter tall to full-size scaffold towers (12 meters). The 'Tower Height' is the distance between the top handrail and the platform, 1m above your feet. A tower's working height is defined as being 1m above the handrail.

To give a sense of proportion, let's assume the average person reaches 2 meters.

So, for example, if you need to reach 6 meters up for a job, a 5.2m tower height would be ideal. All towers greater than 8.2m are only meant for internal use and should not be mounted outside the building in public.

Our available tower sizes according to the platform height:

- 2.2 m
- 3.2 m
- 4.2 m
- 5.2 m
- 6.2 m
- 7.2 m
- 8.2 m
- 9.2 m
- 10.2 m
- 11.2 m

## **Why Choose ABC for Scaffold Tower Hire?**

Lakeside Hire is a nationwide scaffold tower supplier with over 10 years of delivering high-quality and cost-effective scaffolding solutions throughout the UK.

Lakeside Hire team delivers superior products that meet strict safety requirements and technical standards set by the European Standards. Our goal is to provide our clients with high-quality, safe, and original goods.

You can be sure that all our scaffolding has been manufactured by respected industry brands such as Boss, Lyte, and UTS - The market leaders in Europe.

Let us take care of all your scaffold tower needs.

## **Scaffold Tower Hire FAQs**

### **Q: How much do your towers weigh?**

A: Our tower range is light to medium duty, which means they are all easy to transport and assemble. The MiTower, for example, weighs around 200kg and can be lifted by one person.

### **Q: How do I get my scaffolding tower delivered?**

A: We deliver all over the UK for free, so there are no hidden costs. You simply need to call us on 01708866566. We will give you a call to discuss the delivery time that suits you, then arrange for our friendly team to show up at your address on the day of delivery before handing over the tower(s).

### **Q: How long can I hire a scaffolding tower for?**

A: Luckily! There is no limit as long as it depends on your needs.

### **Q: Can I hire scaffolding towers in London?**

A: Yes, we deliver all over the UK

### **Q: What payment methods are available?**

A: We accept cheques and credit/debit cards. All transactions are completed under secure SSL encryption to ensure your details remain safe at all times.
