

PROJECT PROFILE

Overview

An Class 10,000/ISO7 Cleanroom Environment was required for a new project that involved the cleaning, assembly and packaging of critical automotive parts. Guardtech Cleanrooms were involved from the initial design stages right through to installation and validation of the facility. The purpose built modular facility included temperature control and allowed for the dispensing of clean parts into the room. The design allowed for expansion and upgrade of the Classification which was a desirable feature for the client as they continue to plan for future projects.

Scope of Supply

- Partitions
- Doors
- Windows
- Floor
- Walk On Ceiling
- Air Conditioning
- Ductwork
- Lighting
