

PROJECT PROFILE

Overview

A Modular Class 10,000 / ISO7 Cleanroom was required for the development of Food Safety Kits. The unit was to be shipped to Northern Ireland and therefore was completely pre-assembled prior to delivery. Once onsite it was a simple installation process that ran to schedule. A further extension was installed to the Cleanroom, once again demonstrating the benefits of the modular structure. This was achieved through additional panels extending the length to allow for additional equipment. Guardtech also supplied a range of Stainless steel Furniture for the area.

Scope of Supply

- Partitioning
- Sliding Doors
- Glazing
- Fan Filter Units
- Lighting
- Stainless Benching
- Stepper bench
- Installation

Biotechnology – Class 10,000 - ISO7 Cleanroom
