

PROJECT PROFILE

Overview

A Class 100/ISO5 Cleanroom Environment was required for a new device in prototype stage. As this was a step towards main production of the product it was decided that a temporary Softwall Cleanroom was the best option. The modular unit was installed within an existing room and therefore careful balancing was required between areas. Guardtech Cleanrooms were involved from the initial design stages right through to installation and validation of the facility. As this was the first Cleanroom for the client, Guardtech were there to help with operator training and The Guardline Group continue to provide a wide range of consumables for the area.

Scope of Supply

- Softwall Cleanroom
- Fan Filter Units
- ESD Strip PVC
- Lighting
- Stainless Benching
- Stepper bench
- Installation
- Validation
- Training

Printed Electronics – ISO5 Softwall Cleanroom

- Advice
- Design
- Construction
- Mechanical Services
- Electrical Services
- Equipment
- Furniture
- Commissioning
- Validation
- Maintenance
