

PROJECT PROFILE

Medical Device

Overview

A Class 1000/ISO6 Cleanroom Environment was required for new devices in prototype stage. As this was a step towards main production of the products it was decided that a temporary Softwall Cleanroom was the best option. Guardtech Cleanrooms were involved from the initial design stages right through to installation and validation of the facilities. The design allowed for expansion and upgrade of the Classification which was a desirable feature for the clients as they continue to plan for future projects.

Softwall Cleanrooms – Class 1000 / ISO6

Silicon Detectors

Scope of Supply

- Softwall Cleanroom
- Fan Filter Units
- ESD Sheet PVC
- Paneled Ceiling
- Lighting
- ESD Benching
- Stepmover bench
- Installation
- Validation

Client comments

“Our softwall cleanroom installation was conducted cleanly and professionally with minimal disruption to our manufacturing process. Guardtech were able to deliver a fully qualified but cost effective solution to our requirements that performed beyond our expectations. I am happy to recommend their products to anyone who values clear communication and quality of service”

Greg Bale, E2V Scientific Instruments
