

PALLET TRUCKS

W O R - L I F T S

A PALLET TRUCK IS A PALLET TRUCK IS A PALLET TRUCK!

A WORLIFTS PALLET TRUCK IS SOMETHING ELSE!

If you thought all pallet trucks were the same, think again.

Every component of this unique range of Worliffs pallet and scissor pallet trucks was designed, engineered and hand assembled by Worliffs Limited, and can be tailor made or adapted to suit your individual needs, precisely.

No wonder they stand out from the crowd. After all, back in 1977 Worliffs Limited began as a dedicated

pallet truck specialist manufacturer and the same advanced technology we applied then we apply now.

Quite simply, they are the best baa none!

They perform better, for longer, for no more than the cost of an ordinary truck, and if anyone tells you otherwise, they're pulling the wool over your eyes.

☛ **Any Physical Size Available**

right down to the last mm

☛ **Dual Braking Options**

any possible wheel configuration

☛ **Progressive Lowering**

excellent user control

☛ **Articulated Steer Axle**

reduced stress on the truck
