

ESG at a glance

Inspection • Testing • Advice

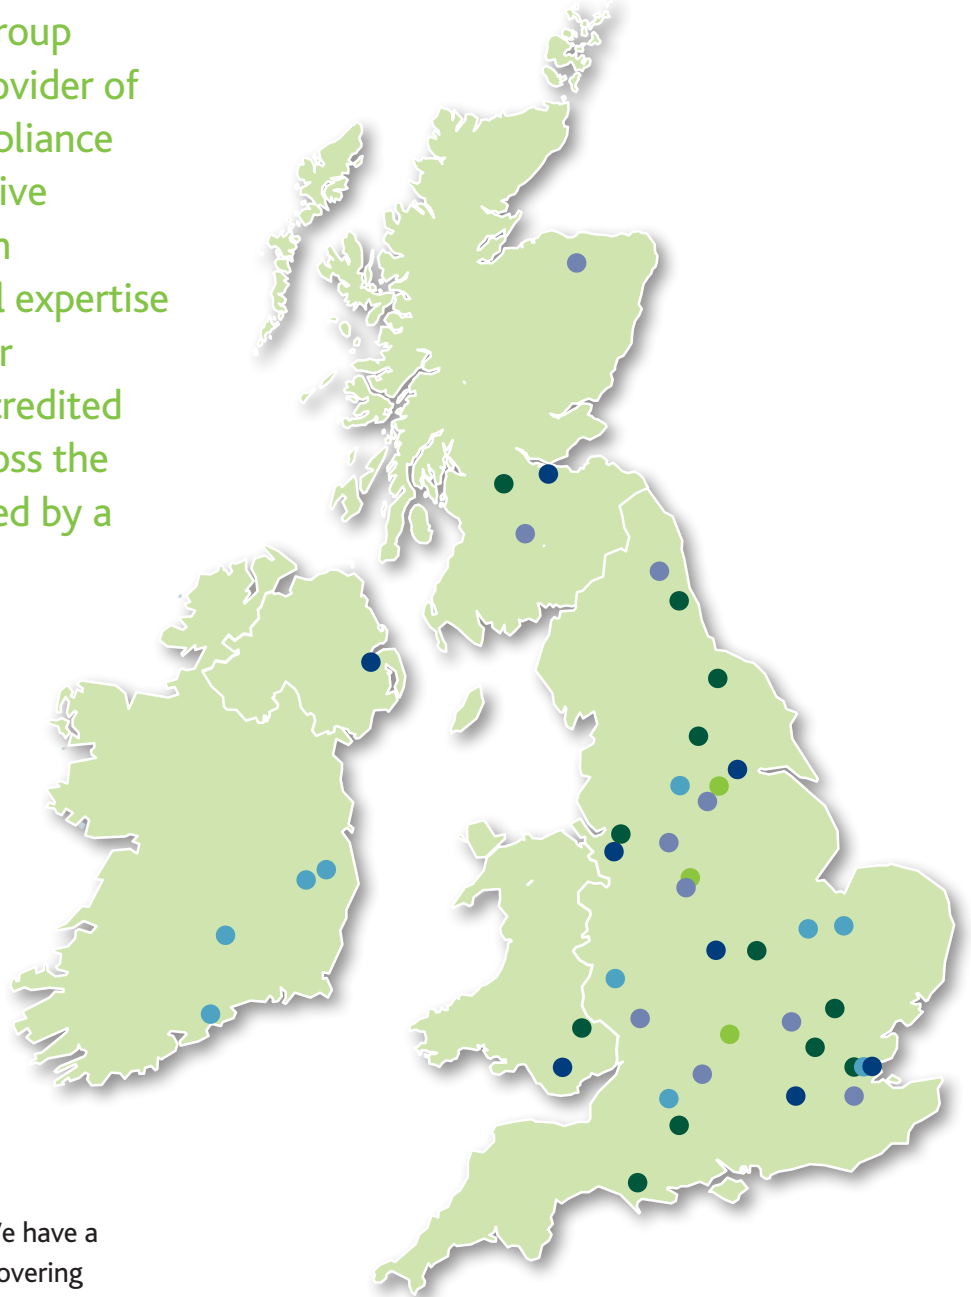

Environmental Scientifics Group (ESG) is the UK's leading provider of testing, inspection and compliance services. Operating across five distinct divisions we offer an unrivalled range of technical expertise and accredited services. Our strong network of UKAS accredited laboratories are located across the UK and Ireland and supported by a centralised head office.

With a history dating back more than 100 years, ESG prides itself on its innovative nature, customer focus and drive to continually improve. Our aim is to grow our capability and provide the most comprehensive range of environmental testing, inspection and consultancy services. Today, the business has more than 1,600 employees and serves over 7,000 customers.

Accredited Services

Quality is built-in to all our processes. We have a comprehensive range of accreditations covering all environmental compliance, quality and food safety issues and are particularly proud of our UKAS certificate numbered 0001.

At ESG, we continually strive to improve everything we do. Our combined expertise enables us to deliver bespoke tailored solutions that meet each client's individual objectives whilst ensuring that quality and integrity is built-in as standard.

- Laboratories & Analytical Services
- Geotechnical Services
- Environmental Safety Compliance
- Materials Testing
- Food Testing

Environmental Scientifics Group specialises in five distinct areas as well as having a comprehensive online risk management system – ESG Online.

Geotechnical Services

Our Geotechnical division is the UK's leading provider of site investigation services. Starting from the ground up, we offer a complete range of services for land and over water, including geophysical site investigation, routine and advanced geotechnical laboratory testing as well as geotechnical, environmental and structural consultancy. Thanks to our extensive range of in-house resources, expertise and technical ability, we can provide quality information and solutions for any size and type of project.

Laboratories and Analytical Services

Our Laboratories and Analytical division offers independent laboratory and analytical testing services covering environmental chemistry, oils, fuel and grease analysis, speciality chemistry, materials testing, nuclear testing and forensic science services. With unrivalled turnaround times, technical expertise and data integrity, ESG is a one stop shop for all your analytical and laboratory testing needs.

Environmental Safety Compliance

The Environmental Safety Compliance division offers a complete and independent solution for environmental safety compliance. With a comprehensive range of services, backed by industry-leading specialist expertise, ESG help businesses to work within Health & Safety regulations and manage environmental risks, offering the peace of mind that they have satisfied their obligations. Services include: stack emissions testing, asbestos management, occupational hygiene and water safety management.

Materials Testing

The Materials Testing division delivers independent testing inspection services and advice through a UK-wide network of facilities. We are experienced in establishing the physical and chemical properties of a diverse range of materials, including: masonry, concrete, plastic, timber, metal and soil – both on and off site. Thanks to our extensive UKAS test methods, we can support contractors, suppliers, primary stakeholders and designers at all the key stages in a project.

Food Testing

Our Food Testing division provides a comprehensive range of testing services for the food and drink, dairy, water and pharmaceutical sectors. Conducting over five million tests each year from our 10 laboratories based across the UK and Ireland, we ensure that our customers benefit from the utmost integrity and the highest standards of service.

ESG Online

ESG Online is a powerful, comprehensive, yet easy to use management system providing a complete and independent solution for Environmental Health & Safety compliance. Businesses can be confident that they are aware of their legal obligations and best practice requirements in real time enabling them to reduce risk, maintain business continuity and drive change to continuously improve. This innovative and bespoke system has been developed with the customer as the focus and offers a complete compliance document and information storage solution, prioritised action planning and management information reporting.
