

Energy Management Policy

Swish Building Products is committed to using energy in the most efficient, cost-effective and environmentally responsible manner possible. To achieve this Swish will:

- Monitor and measure energy usage weekly to identify the most significant areas of use and prioritise these areas for reduction measures
- Set normalised energy reduction targets to measure continuous improvement
- Promote energy awareness amongst all staff and involve them in achieving the target
- Consideration is to be given to life-cycle energy costs and efficiency when purchasing new equipment
- The use of suitable energy-efficient technology, equipment and best practise methods is promoted.
- Energy performance will be reviewed continually through the development, implementation and communication of an energy audit plan

A handwritten signature in black ink, appearing to read 'S Hanrahan'.
