'FLEXIGRIP' CABLE SEALS

The Universeal 'Flexigrip' Series represents the ultimate in high security cable seals.

- Patented extra strong steel gripping mechanism.
- High quality Stainless Steel wire.
- High-Tech plastic bodies
- Can be bar-coded.
- Security numbers secure inside plastic body.
- Five sizes available.

These seals are available with varying cable diameters to accommodate all applications. They are virtually impossible to replicate and are extremely 'Tamper Evident'. Company identification and security numbers remain secure inside the high tech plastic case which is then ultrasonically welded for 'Total Security'.

'PRS' PLASTIC RING SEAL

The Universeal Ring Lock Seal is a low cost one piece plastic seal.

- User friendly with no sharp edges
- The Ring Lock is made of non corrosive polypropylene
- This seal can be applied and removed without the need of tools
- There are three lengths available, 217mm, 165mm and 127mm in a full range of colours

Seal can be customised.
Minimum quantities apply.

The Ring Lock has an easy engagement and the opposed but offset double locking mechanism, totally concealed within the case, makes tampering virtually impossible. It also has a large flange to ensure tools cannot be inserted for manipulation purposes. The quality of the plastic is superb and the large clear printing makes reading, often done in poor light, easy.
