

Clean Air Canopy

Monmouth Scientific's new Clean Air Canopy offers fantastic versatility for a huge variety of applications where clean air is required over a piece of equipment, as a mobile solution or just as a clean bay.

Available in a standard size of 2.2m square with an internal height of 2.2m the system will provide clean air upto ISO Class 7 (Class 10,000). The system can be specified with wheels for local mobility or adjustable feet, should a fixed canopy be required.

The system is typically supplied with one solid wall and three strip curtain walls but as a no cost option, the user can specify 0, 1, 2 or 3 solid walls. Overhead internal lighting is also offered as an option.

The standard systems start from just £7,995+VAT (including delivery & installation) but we also offer a bespoke service to manufacture a specific size or shape to any customer requirements.

For further details or to discuss specific requirements, please contact us directly on 01278 458090.
