

DUST CONTROL AND AIR FILTRATION ENGINEERS

dustair

Today the importance of clean uncontaminated air in the industrial work environment is well known. Modern industry with its complexity

of operations and processes uses

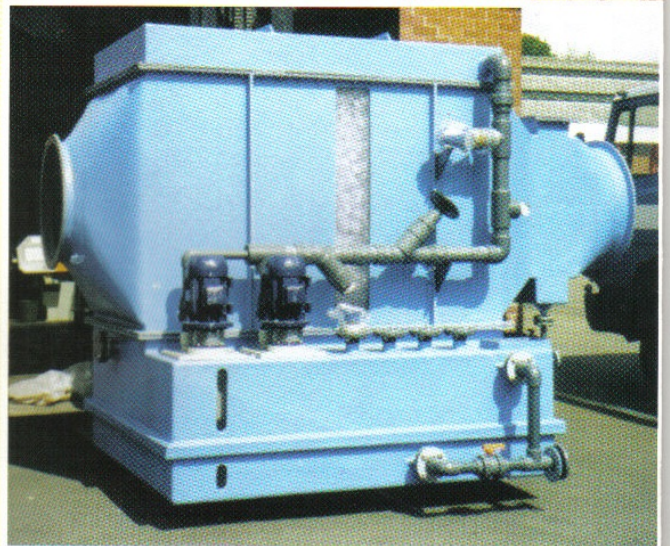

an increasing number of chemical compounds and substances, many of which may be highly toxic. The use of such materials may result in a dissemination of fumes, gases, dusts and vapours into the workroom air. Effective, well designed exhaust systems offer a solution where protection of workers is needed.

Through experience we have shown that the amount of air exhausted to control any dust or fume problem needs to be carefully selected. This ensures the minimum volume of air is used in conjunction with properly designed hooding, and/or guarding to achieve effective control. This in turn ensures that we can offer a cost effective solution to any dust or fume control problem.

This Brochure briefly outlines the services we can offer in the fields of dust and fume control, together with ventilation systems. Dustair Limited have the facilities to provide a competitive and technical service, together with free estimates and advice relating to your specific problems and requirements. If you need a solution to your air pollution problems, please write to, telephone, fax or E.Mail our engineers with your requirements. When you contact us, we will be happy to visit, assess your problems, and offer an efficient system of control. Alternatively our extensive range of products and services is displayed on our Website; www.dustair.co.uk

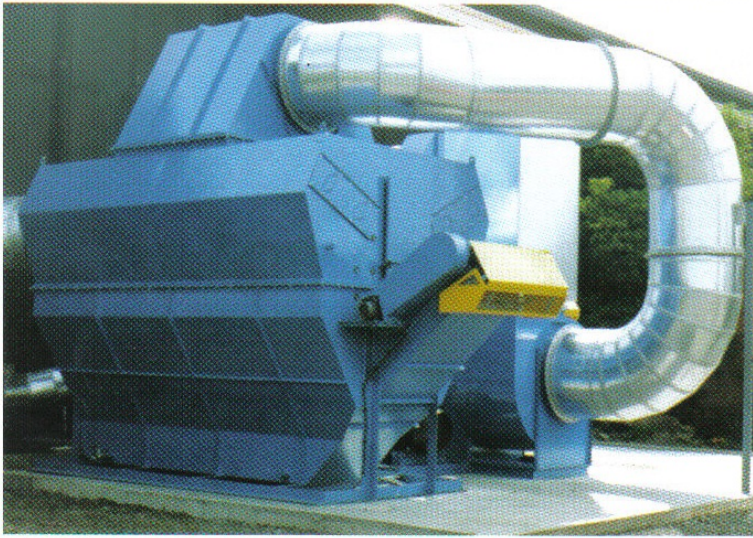

Ductwork Systems

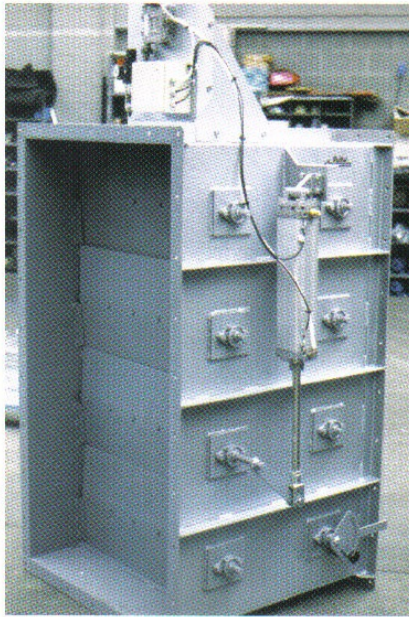

Acid Fume Scrubber

dustair *e n v i r o n m e n t*

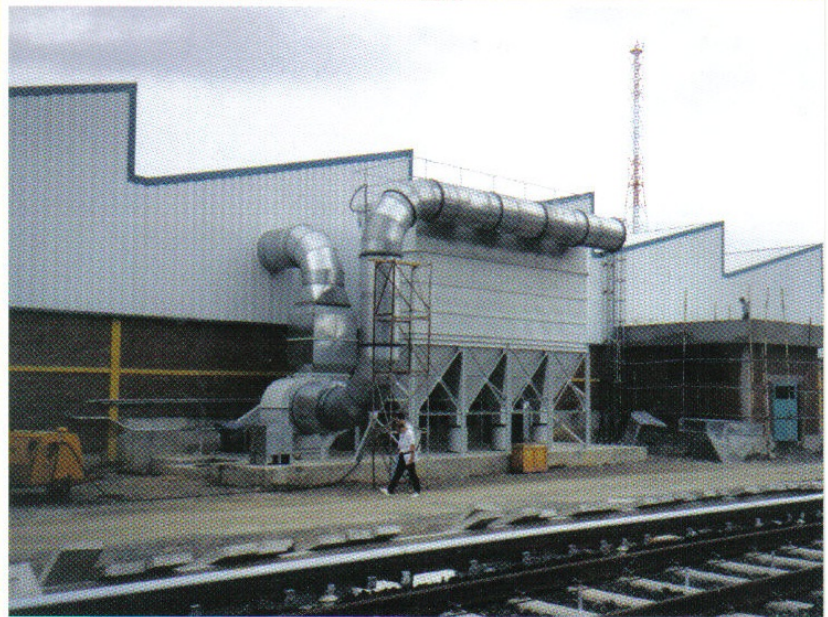

Hand/Auto De-sludge Wet Arrestors

Specialist Designs

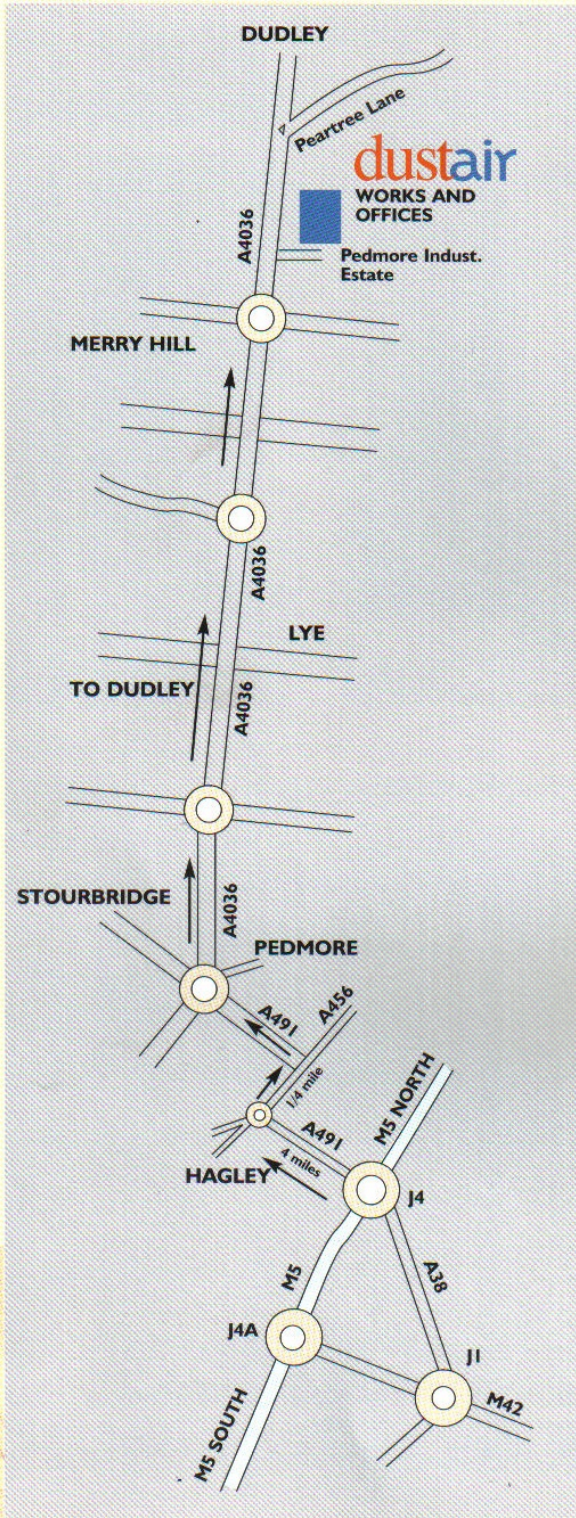

Heavy Duty Fire Damper

Dry Dust Filtration Systems

pollution control
tal purification

ROUTE TO DUSTAIR LTD.

Leave M5 at junction 4 and follow A491 until it branches to A4036. We are situated on Pedmore Road Industrial Estate on the right hand side.
