

**DRIVING FORWARD
SUPPLY CHAIN EXCELLENCE**

PROTEUS® FREIGHTWARE TRANSPORT MANAGEMENT SOLUTION

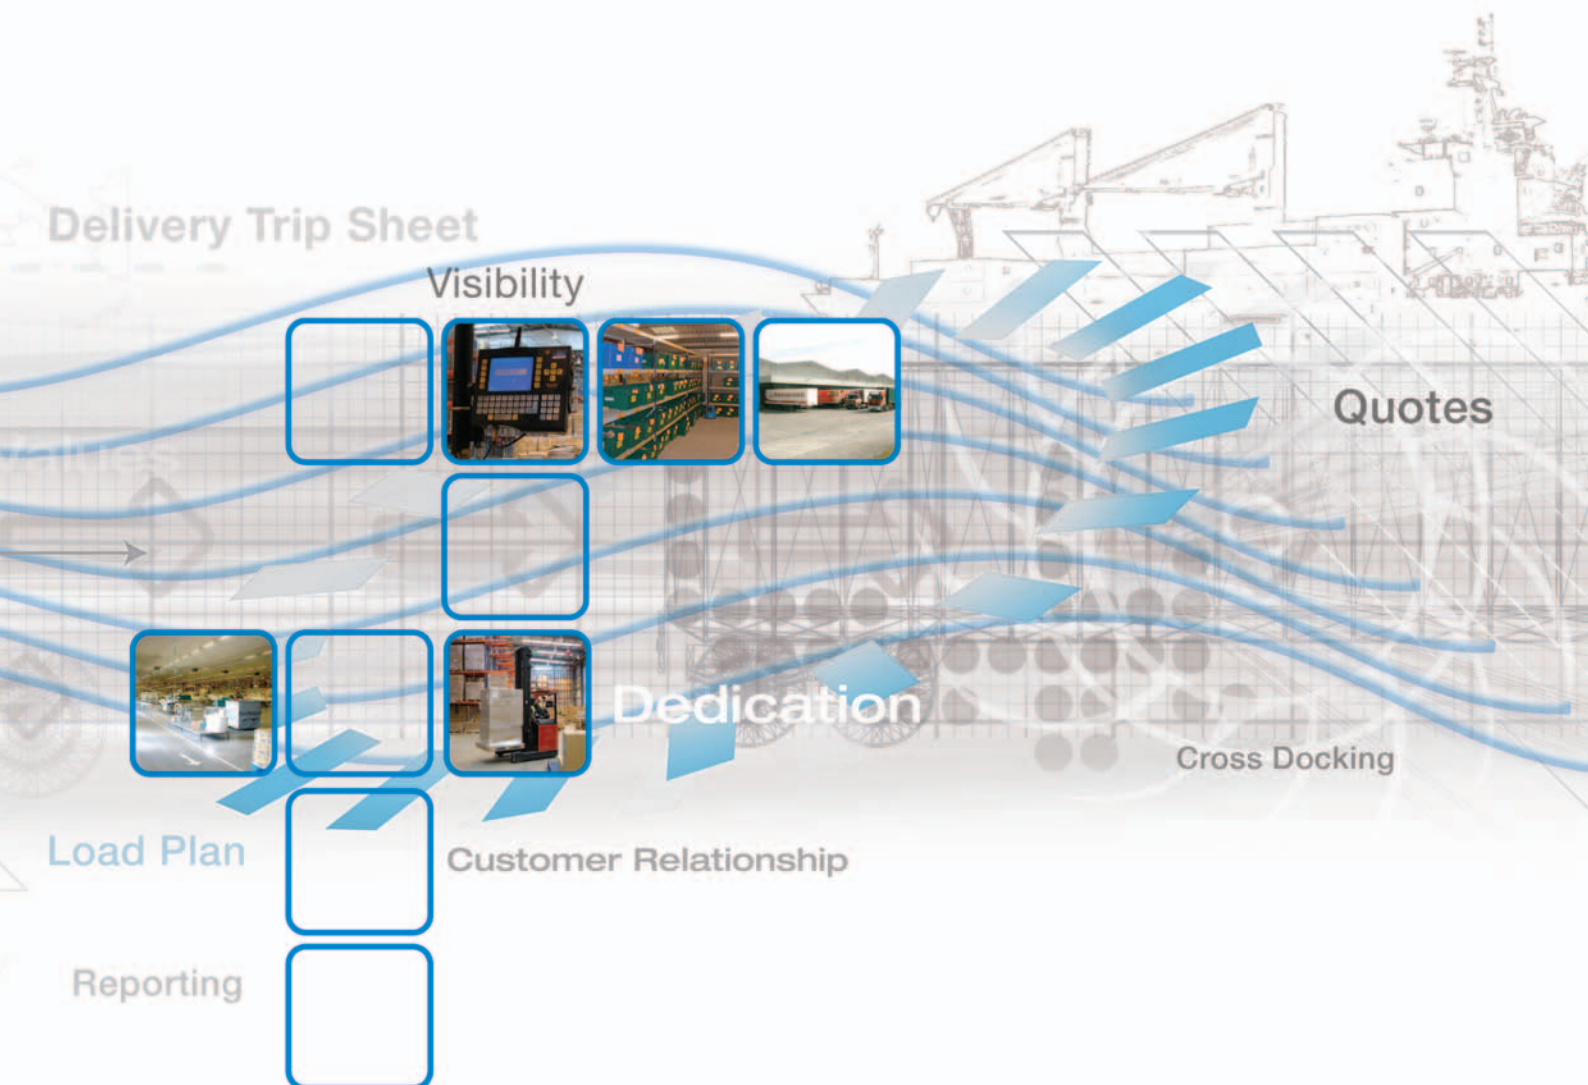

Companies involved in the Logistics and Transport industry today need to react to demands for real time information, requiring instant access to live data. The solution is a complete end-to-end Transport Management system, which must have comprehensive functionality, and be easily integrated with third parties, customers and suppliers to deliver optimum operational efficiency.

PROTEUS® FreightWare is a flexible Transport Management Solution that has the key elements required by those professionals responsible for improving transport and logistics operations. It has been designed to optimise operations, increase productivity, drive down costs and improve customer service. It enables transport and logistics managers to have total visibility and control over the day to day operational processes on a real time basis.

PROTEUS® FreightWare functions include:

- [Activity Management](#)
- [Transport Management](#)
- [Delivery Management](#)
- [Client Management](#)
- [Order Management](#)
- [Despatch Management](#)
- [Track & Trace](#)
- [Collections Management](#)
- [Vehicle Routing and Scheduling](#)
- [Billing](#)
- [Mobile Connectivity](#)
- [Quotations](#)

A highly functional and proven application suite, PROTEUS® FreightWare can be seamlessly integrated with the PROTEUS® Warehouse Management software suite to provide end-to-end supply chain execution.

PROTEUS® FREIGHTWARE ACTIVITY MANAGEMENT

PROTEUS® FreightWare Activity Management can give your company increased competitive advantage by providing control and enabling you to get the right goods to the right place, at the right time.

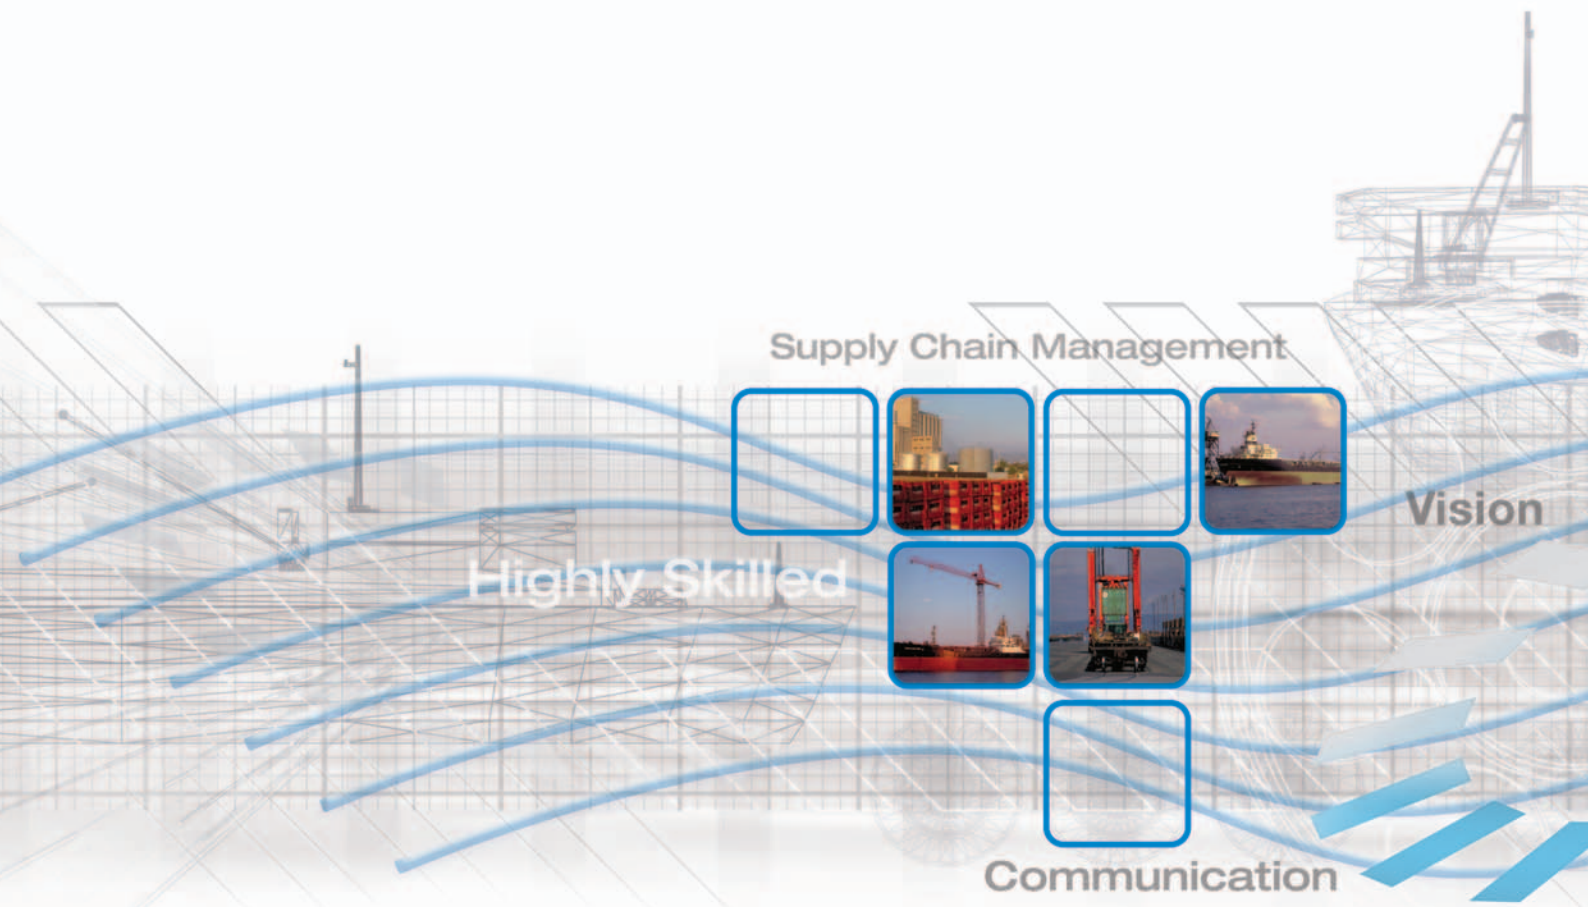

The PROTEUS® FreightWare Activity Management module allows users to raise quotes, trigger activities, and track & trace products through to delivery and to the consignee. It gives a full audit trail of documentation allowing comprehensive reports to be produced. It will prioritise orders to be delivered in a logical sequence, showing any export details. The FreightWare® Activity Management module can be fully integrated into any ERP solution.

PROTEUS® FreightWare Activity Management features:

- Quotations for Collections & Deliveries
- Delivery Validation with Business Rules
- Track & Trace
- Activity Triggers
- Order Manager Viewer on line
- Electronic Order & Delivery Confirmation
- Order Prioritisation
- Export Details
- ERP Integration

Benefits include:

- Instantaneous quotations
- Full track and trace of orders
- Actions can be planned and easily managed
- Dynamic views of data for order analysis and planning
- Real time reports
- Accurate stock visibility across multiple sites
- Accurate prediction of delivery dates
- Stock location and visibility

PROTEUS® FREIGHTWARE TRANSPORT MANAGEMENT

PROTEUS® FreightWare Transport Management has all the fundamental functions expected by transport operation professionals, and provides the tools that the transport office needs to respond and manage activity volumes, and customer demands.

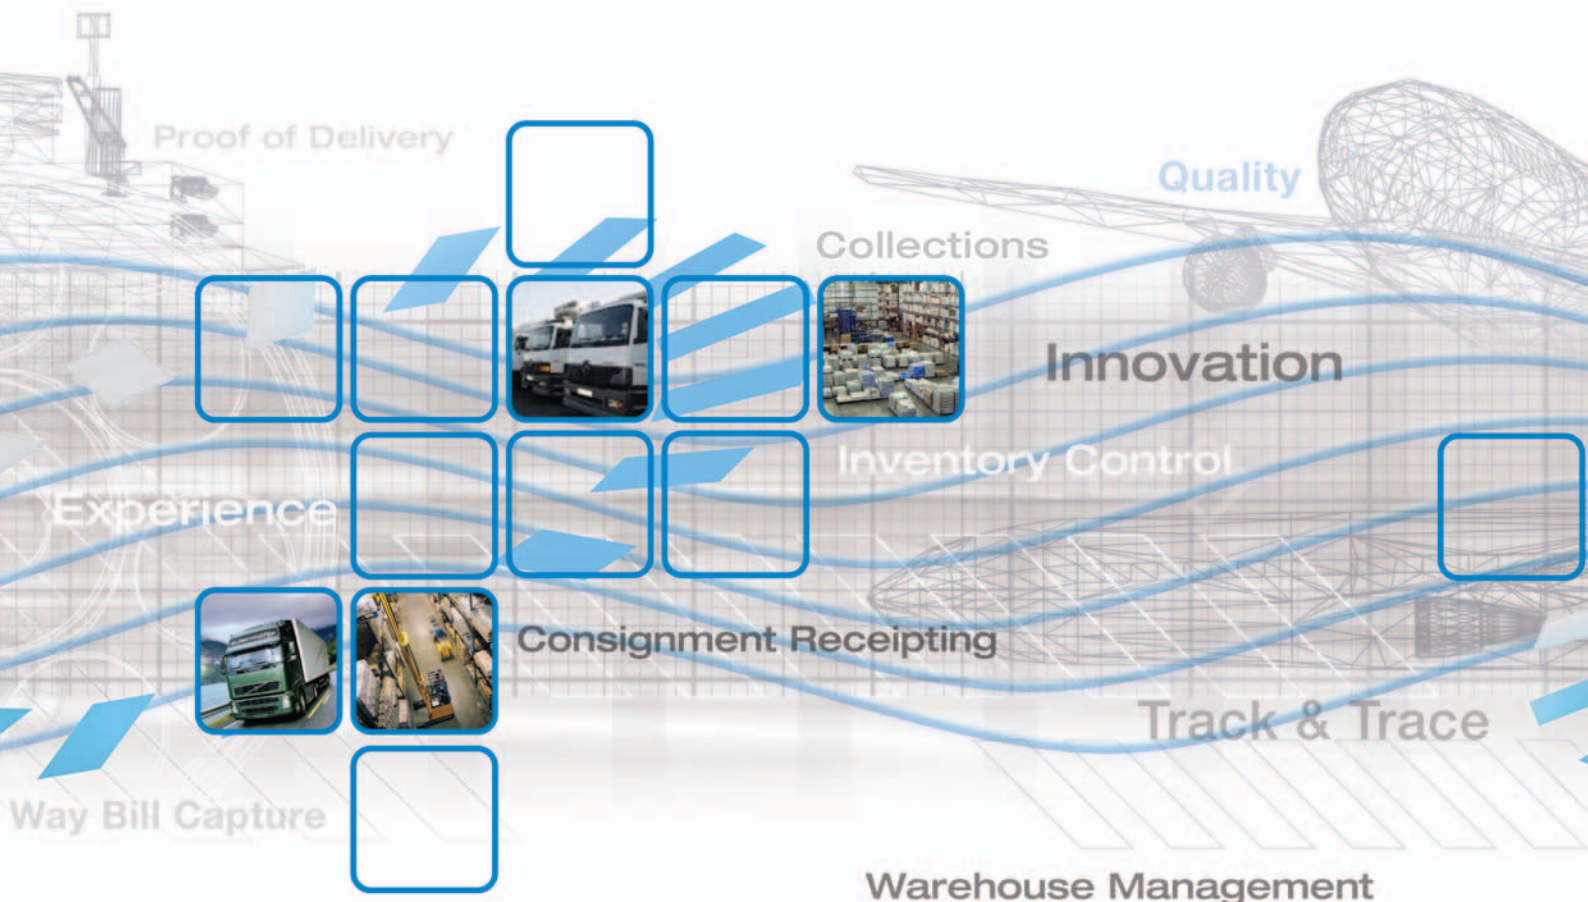

PROTEUS® FreightWare Transport Management provides real time information, giving customer service departments the information they require in order to achieve customer satisfaction. All stock movements are clearly visible, and can be traced from despatch to delivery. Vehicle scheduling can be matched to Driver Briefing to optimise delivery routes and driver schedules. Loads are assigned to vehicles to optimise space, according to weight & dimensions and the load plan. PROTEUS® FreightWare Transport Management can be fully integrated into an existing WMS Solution or PROTEUS® Warehouse Management software suite, achieving operational effectiveness, and providing complete control of the Supply Chain required by those professionals responsible for delivery of goods.

PROTEUS® FreightWare Transport Management features:

- Activity Manager
- Delivery & Collections Pricing Rules
- Trip & Drop Routing
- WMS Integration
- Vehicle Scheduling
- Load Assignment
- Driver Briefing
- Despatch Manager
- Driver Records
- Special Instructions

Benefits include:

- Accurate prediction of delivery dates and times
- Real time driver scheduling
- Real time reporting
- User friendly information tools
- Highly visible audit trail

PROTEUS® FREIGHTWARE DELIVERY MANAGEMENT

The Delivery Management module within PROTEUS® FreightWare gives complete control of managing deliveries by reducing time, decreasing effort and relieving frustrations involved in ensuring goods are delivered on time to end users, branches, sub-contractors and suppliers. It provides an audit trail of paperwork and has the capacity to produce user defined reports electronically within seconds.

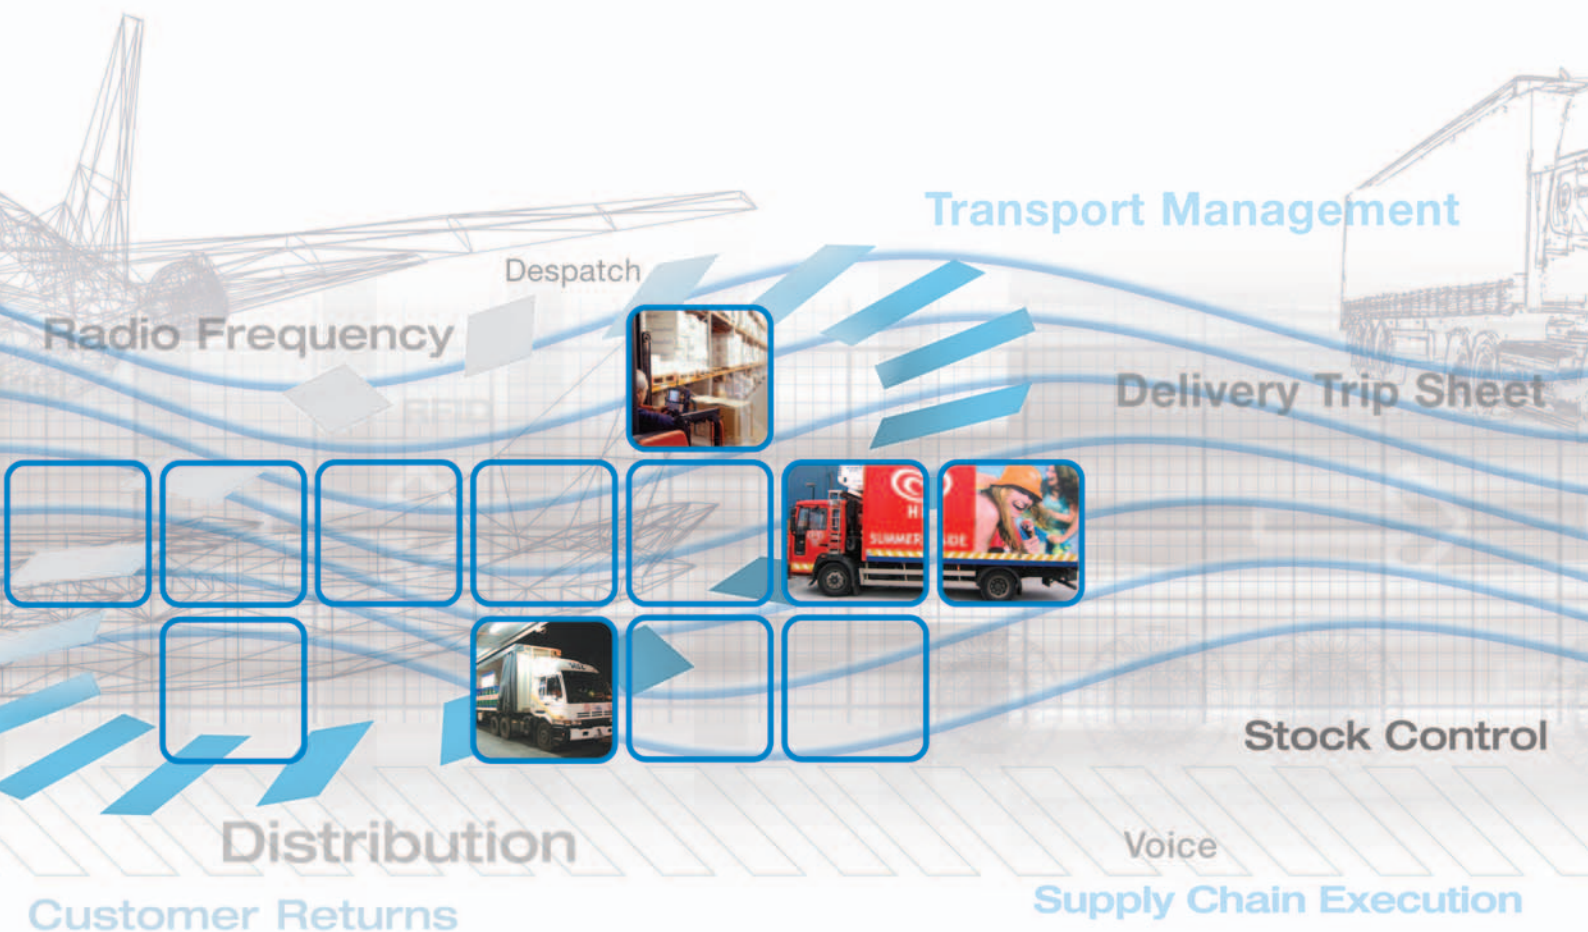

PROTEUS® FreightWare Delivery Management produces delivery manifests, collection instructions and waybill notes. Connected to In-Cab mobile technology, it is a very powerful software suite that controls delivery records, driver de-briefing and monitors delivery exceptions.

PROTEUS® FreightWare Delivery Management features:

- WMS Integration
- Delivery Manifest
- Collection Instructions
- Way Bill Notes
- In-Cab Mobile Connectivity
- PoD Manager
- Delivery Records
- Driver De-Briefing
- Delivery Exceptions

Benefits include:

- Seamless operations between warehouse and transport solutions
- Increased operational efficiency
- Exception reporting
- Immediate information

PROTEUS® FREIGHTWARE CLIENT MANAGEMENT

The PROTEUS® FreightWare Client Management module has been designed to easily manage the billing and reporting requirements of transport, operations and logistics managers.

As information is captured at all points of the delivery process, a record of all stock movements can be produced within seconds. The system has the ability to display Proof of Delivery (PoD) images on the web, giving PoD transparency, enabling the user to retrieve information quickly. It can then email PoD receipts, or send PoD receipts by SMS or text message. Tracking of hard copy PoD information has simplified retrieval of delivery records. As a result users are able to search for documents very quickly, increasing efficiency.

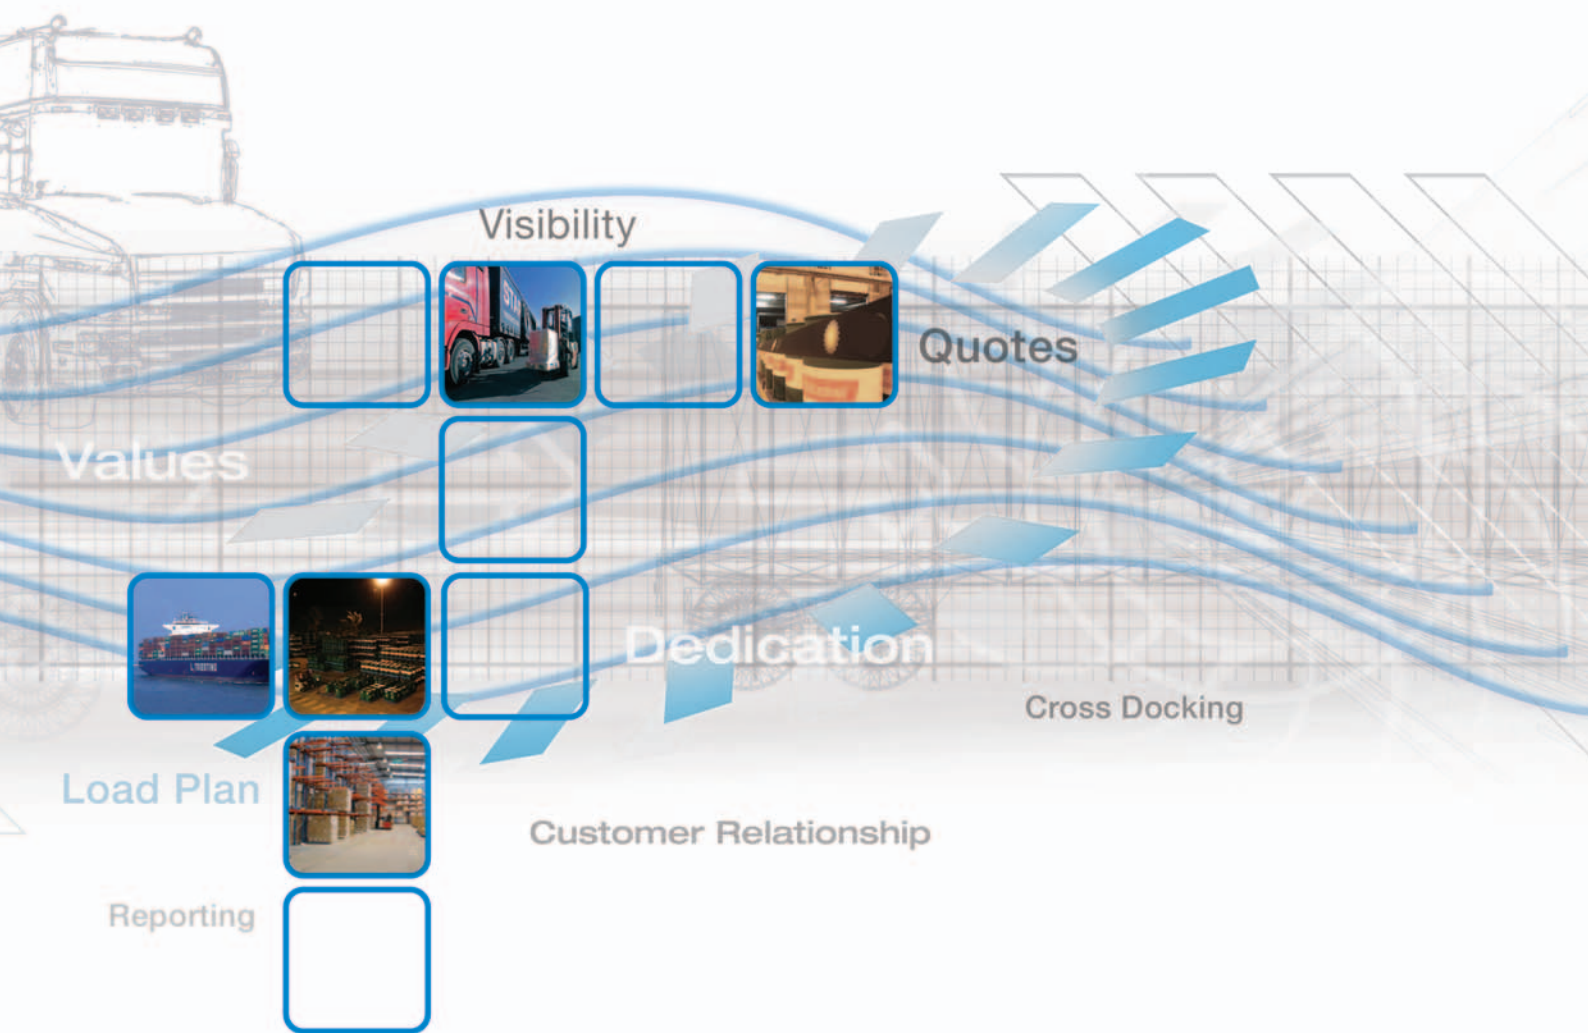

PROTEUS® FreightWare Discrepancy Reports works in conjunction with FreightWare® Action Alerts. A discrepancy report triggers an action alert, which could be discrepancies in deliveries or driver schedules for example. An action alert can be sent as an SMS message to a mobile phone, an email to a PC or output to a file. Alerts can be triggered at anytime, but can also be defined and configured to the needs of individual transport managers and warehousing personnel. The alerts can have a set date and time, however the software is so flexible that alerts can be on a minute by minute, daily, monthly or annual basis. Alerts can be set as single alerts or combined together resulting in multiple alerts. The parameters can be changed at any time as needs arise.

PROTEUS® FreightWare Client Management features:

- Client Billing
- PoD Searches
- PoD Web Searches
- SMS Action Alerts
- Email PoD Images
- Discrepancy reporting
- Final Storage Tracking
- Track & Trace

Benefits include:

- Proactive resolution of PoD discrepancies
- Easy tracking and management of outstanding PoDs
- Monitoring of service levels becomes easier
- Improved efficiencies from source to destination
- Early notification of potential problems
- Improved customer service levels

SUPPLY CHAIN EFFICIENCY

Ensuring that goods are delivered on time, to the right place, is vital to the success of any company surviving today's competitive market. Use of technology to aid supply chain processes can increase your company's competitive advantage. By utilising resilient and stable IT solutions that give you the ability to respond to any changes occurring in the execution of your supply chain, you also increase your reputation for reliability, enhancing customer and supplier relationships.

PROTEUS® FreightWare Transport Management complements PROTEUS® Warehouse Management to provide powerful and resilient supply chain solutions that give visibility of stock movements from the moment stock touches the warehouse through to delivery to the end user. All the processes become transparent. Audit trails and reporting tools are an integral part of the solution. Information is readily available. The combination of PROTEUS® FreightWare and PROTEUS® Warehouse Management provide a seamless supply chain operation, which enables relatively problem free supply chain execution.

Further functions of PROTEUS® FreightWare Transport Management Solution:

- Waybill Capture
- Weights and Dimensions
- Deliveries
- Collections
- Returns
- Linehaul
