Bespoke Stainless Steel Sinks & Cabinets for the Healthcare Sector

What made the client contact cleanroomshop.com?

Our client was contracted by Trafford General Hospital to supply & fit some bespoke stainless steel sinks with built in cabinet storage. They got in touch with cleanroomshop.com as we are able to manufacture bespoke stainless steel furniture and have a lot of experience in the healthcare sector.

How did cleanroomshop.com help the client?

Despite the extremely bespoke nature of the furniture we were able to provide a competitive quotation and manufacture the sinks within our standard lead time of 5-10 working days from the receipt of order.

Full drawings were provided prior to manufacture so the client was confident that the furniture was being produced to the correct specification.

What was the result?

One satisfied client...

“Our Client is very happy with the final product, fit for purpose, and especially when the units were bespoke produced for the facility.

“Thanks for all your assistance and I will most certainly recommend your Company on future projects of this nature.”

Our client's comment - Subcontractor for Trafford General
