

Protecta plus glove

A CUT LEVEL five... THAT FEELS LIKE A CUT two

PROTECTA PLUS

- Recommended where excellent finger movement is needed and good touch sensitivity.
- Highly protective against cuts, ideal for handling sharp metal sheets, glass, blades & knives.
- Good resistance to abrasion and puncture.

Manufactured entirely with Protecta fibre, Protecta gloves offer a high degree of dexterity, reduce hand fatigue and allow the hand to breathe.

Protecta is a grey coloured **multifibre thread using Dyneema®** and fibreglass, this combination offers better cut resistance than existing para aramid products.

These gloves are among the best cut resistant gloves in the market today, they are the comfortable to wear, dexterous and washable.

The glove is available in four sizes: S 7 – M (8) – L (9) - Extra Large (10) -

Recommended areas of usage;

Gloves can be used when handling sharp items in a dry environment, industries like glass, canning, railroad, and wherever there is sharp metals or plastics,
