

TEK 547 Cut resistance Glove

EN388: 234x

*An extremely comfortable glove
with lots of sensitivity and touch,*

The Tek 547, offers cut protection on the whole of the hand whilst letting your hand breathe on both sides, the palm and the back.

The 547 glove is manufactured with Dyneema fibre, This ultra high molecular weight polyethylene fibre allows strength without bulk.

The TEK 547 is completely lint free , and can be used in a class 100 cleanroom environment.

But the main benefit of this glove is that it is breathable in the palm of the hand, **and** also on the back of the hand,

The dots are made of silica and provide a superb grip on slippery substances,
The glove is available in four sizes : **Small, Medium, Large, and Extra Large**

Washing Instructions

The gloves are washable, and can be washed in a conventional washing machine, with a setting of 40 °C Centigrade or lower, please use a **Non Biological washing powder***,

*(Biological powders have added enzymes which will break down and 'eat' the dirt. But unfortunately will also damage this fibre in the process).

Also important is the Drying process. The gloves should be dried at room temperature; leaving them out to dry (drip-dry).

Caution: drying by mechanical means with temperatures over 40 ° C (Centigrade) may damage the fibre and reduce the cut level resistance, and may also shrink the glove.
Cut resistance is maintained up to 3 washes if dried below 40 ° C.

PERFORMANCE

This article is undergoing tests to satisfy the required European safety regulations, and to satisfy the minimum demanded norms of the European directive 89/686/CEE. relating to articles of individual protection regarding health & safety norms.

PROTECTION LEVELS

This article is listed under CE CATEGORY 2

EN 388 : 234X	
Abrasion	Level 2
Cut	Level 3
Tear	Level 4
Perforation	Level x
