

Search-*lite*

*When there is only a glove between your hand and a needle,
You hope it is the best,*

Klass Searchlite gloves have been designed to enable a user to perform individual searches into different hazardous locations like pockets , bags, and poorly illuminated areas,

These patented gloves are lined inside with a new material called sharkskin, Sharkskin comprises very closed weaved aramid fibres, that provide excellent puncture resistant to surface materials.

Wafer thin, Yet Incredibly Protective

SharkSkin Gloves provide the protection you need without sacrificing your flexibility, sensitivity, or comfort. SharkSkin protect you against threats from needles , nails, wire, glass fragments, metal splinters, wood splinters etc.

Available in 3 sizes : S, M, L,

Washing Instructions : Washing not recommended

PROTECTION LEVELS

This article is listed under \in CATEGORY 2

EN 388 : 3444 (abrasion, cut, tear, puncture).

Abrasion performance	Level 3
cut resistance	Level 4
Tear resistance	Level 4
Puncture resistance	Level 4

Tested to EN388

Please note for needles;

(On normal working conditions the glove can stop a needle going through, but if a needle is pushed with force, ***it will*** and can definitely go through.)
