

ENVIRONMENTAL POLICY

COMMITMENT

The Company will endeavour to minimise the environmental impact resulting from our production processes and other operations.

We will maintain an open relationship with the local community, our employees and regulatory authorities, providing them with relevant information about all our activities.

ENVIRONMENTAL MANAGEMENT

We will monitor our performance, set objectives and targets to ensure that we comply with all current legislation and industry best practice.

We will invest in appropriate technology as a means of achieving improvements in our environmental performance.

RESOURCE MANAGEMENT

The Company is committed to the efficient use of all natural resources.

We will encourage the re-use and recycling of materials and where possible, the conservation of non-renewable resources.

We will minimise and dispose of unavoidable waste in a safe and responsible manner.

TRAINING AND COMMUNICATION

The Company is committed to employing and training qualified people to ensure that the necessary expertise is available.

We will train and encourage our employees to work in an environmentally responsible manner.

We will support initiatives to protect the environment and raise public awareness on environmental issues.

We will integrate our environmental policy, programmes and practices into the management of our business and ensure that customers, contractors and suppliers of the company are aware of our commitment.
