

**We make managing
your healthcare
waste safe and easy...
Clinical & Domestic
Sackholders**

wybone

a world of bins that don't cost the Earth

Total Peace of Mind

1
Bin filled with rubbish and accelerant to ignite fire. Bin left open for 15 seconds to enable fire to become established.

2
Lid closed, starving fire of oxygen.

3
Lid opened to reveal extinguished fire which has been totally contained within the unit.

Meets fire code
#TM05-01 NHS

At wybone we offer many different solutions for the health services + we take great care in understanding your clinical needs...

Welcome to the Wybone Sackholders Catalogue.

At Wybone we understand that cleanliness, fire safety and the efficient management of all waste streams is of paramount importance within Healthcare premises. All sackholders are manufactured to exacting standards enabling them to comply with all your legislative requirements.

We have successfully held the contract for supply of sackholders to the NHS contract no. N6 M/0278/ 0701/03 since 1998 and produced sackholders since 1973.

Standard Antibacterial coating helping minimise cross infection and the spread of disease

Wybone Antibacterial Coating DELIVERS SILVER IONS AT THE COATING SURFACE

Silver is a well documented bactericide which is not harmful to human health and does not promote resistance in the bacterium. When in contact with a bacterium silver is absorbed by the bacterium and through a range of actions that destroys cellular function the viability of the organism ceases.

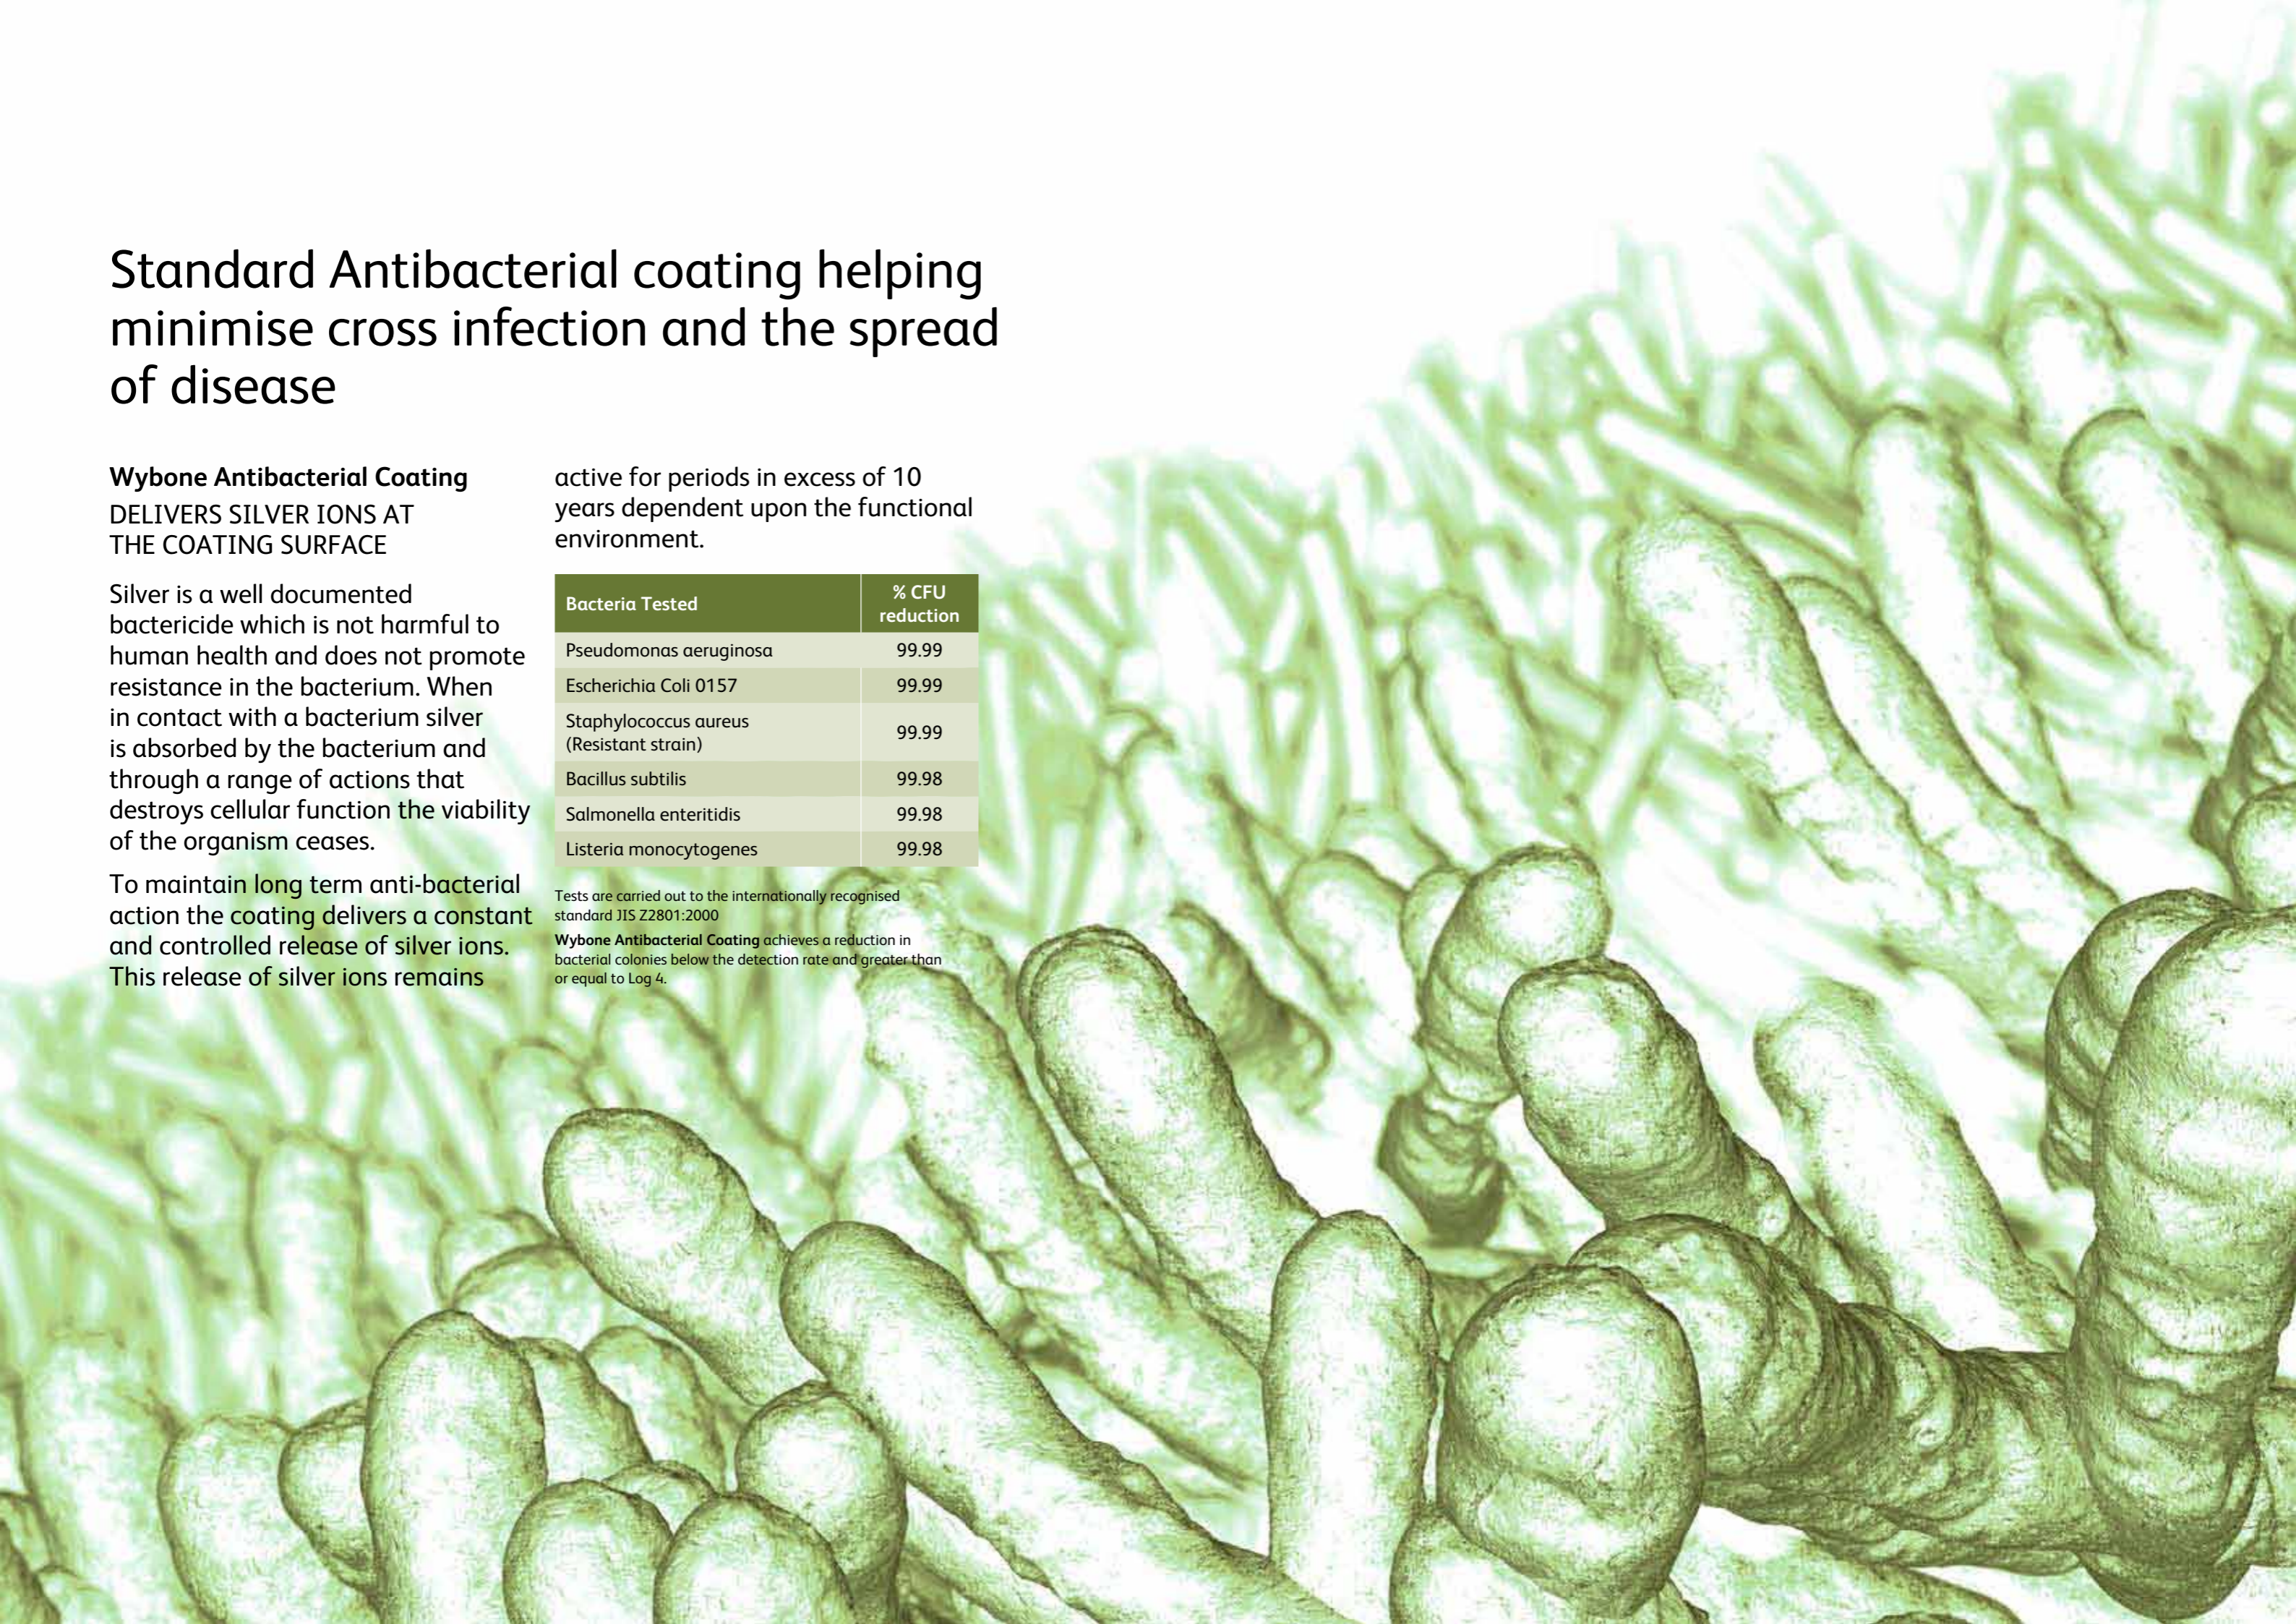

To maintain long term anti-bacterial action the coating delivers a constant and controlled release of silver ions. This release of silver ions remains

active for periods in excess of 10 years dependent upon the functional environment.

Bacteria Tested	% CFU reduction
Pseudomonas aeruginosa	99.99
Escherichia Coli 0157	99.99
Staphylococcus aureus (Resistant strain)	99.99
Bacillus subtilis	99.98
Salmonella enteritidis	99.98
Listeria monocytogenes	99.98

Tests are carried out to the internationally recognised standard JIS Z2801:2000

Wybone Antibacterial Coating achieves a reduction in bacterial colonies below the detection rate and greater than or equal to Log 4.

Think about disposing of your waste safely

It is important that the correct waste goes into the correct bin. All Wybone Sackholders help you segregate your waste into the correct waste streams so you know that your waste will be disposed of safely.

All bins come with a mushroom body as standard. White and grey bodies are also available upon request. The components and lid colours should be specified as per the following usages:

Black
General/Domestic Waste

DEEP LANDFILL: General waste. Personal Protective Equipment not contaminated with body fluids. Paper towels, disposable cups, newspapers, rinsed medicine tots, packaging from medicine and uncontaminated dressing, badges etc.

Yellow with Black Stripe
Offensive Waste

DEEP LANDFILL: Incontinence pads, colostomy bags, urine bags, dressings and PPE contaminated with body fluids NOT known to be infectious.

Orange
Infectious Waste

INCINERATION: Items known to be contaminated with infectious pathogens e.g. Dressings from known infected wounds, and other items that have been in contact with infectious body fluids.

Yellow
Hazardous Waste

INCINERATION: Category A waste (Infectious waste - yellow bags) Sharps contaminated with drugs.

Violet
Cytotoxic/Static Waste

INCINERATION: This is waste which contains specific drugs, such as hormones.

Ask the experts!
Unsure of which sackholders or colour to use where?
Let Wybone visit you and undertake a waste audit.

Meet our family of Wybone Sackholders

Families come in all shapes, sizes and colours. Just like Wybone's sackholder range. From 15 to 98 litres there's sure to be a size and colour scheme to suit your individual needs. **Ordering your waste bin has never been simpler. By following 4 easy steps you can place your order accurately and with ease. Please call 01226 744010 if you need any further information.**

1 Size

Your first decision is, "What size do I need?" We've indicated the capacity on each bin.

2 Mechanism

Next - "Do I need fixed body, removable body or hands free?"

3 Component & Body Colour

Then, choose your colours, determined by the type of waste you are required to segregate. See pages 6-7 for further details.

4 Options

All our bins are available with 5 optional extras: See pages 10-21 for further details.

**Catch it.
Wybone it.
Kill it.**

NHS

Healthcare Waste Bins

This small capacity squat unit is ideal for underneath or on top of work surfaces where small volumes of clinical waste are generated.

1 Size

2 Mechanism

Hand Operated RFG/4/MINI HO

Weight 4kg

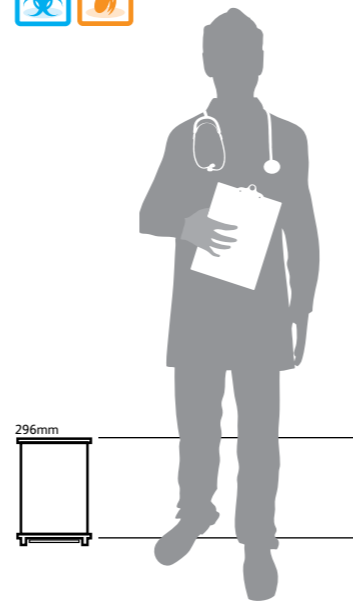

Fixed body with no foot pedal operation, this bin is ideal for use on top of laboratory work surfaces where a disposal unit needs to be immediately to hand.

Get your message across.

With cross infection being of primary concern to all healthcare personnel, minimising cross contamination of waste streams is paramount. Let Wybone letter your sackholders to denote the correct waste to be deposited, whether that is 'domestic'

or 'clinical' waste. We can also highlight the correct operation of the units with our range of fun lid stickers. Waste audits are also available upon request. Please ring for details on 01226 744010.

Healthcare Waste Bins/Sani Bins

Our range of sani bins are designed to accept standard sacks. Available in a wide range of sizes and capacities they will suit most applications. Built in modesty chute ensures all waste is hidden when depositing refuse. Standard colour coding means that they will fully comply with clinical waste segregation.

98 Litre Nappy Sanitary Bin WSB/31

Hand operated sanitary bin with powder coated body and top. Features a anti bacterial finish and a one way chute system.

Shhhh...

stay nice and quiet with soft close lids

It's oh so quiet... Well it is when a Wybone soft closing lid is fitted to your sackholder. The soft closing mechanism slows the closing of the lid therefore making it almost silent. Soft Closing Lids are ideal for use on wards where a peaceful, ambient environment is required.

A soft closing lid is compatible with any size and style of Wybone sackholder.

They can be retrofitted to your current sackholders, please call for further information.

The molecular make up of a Wybone Sackholder

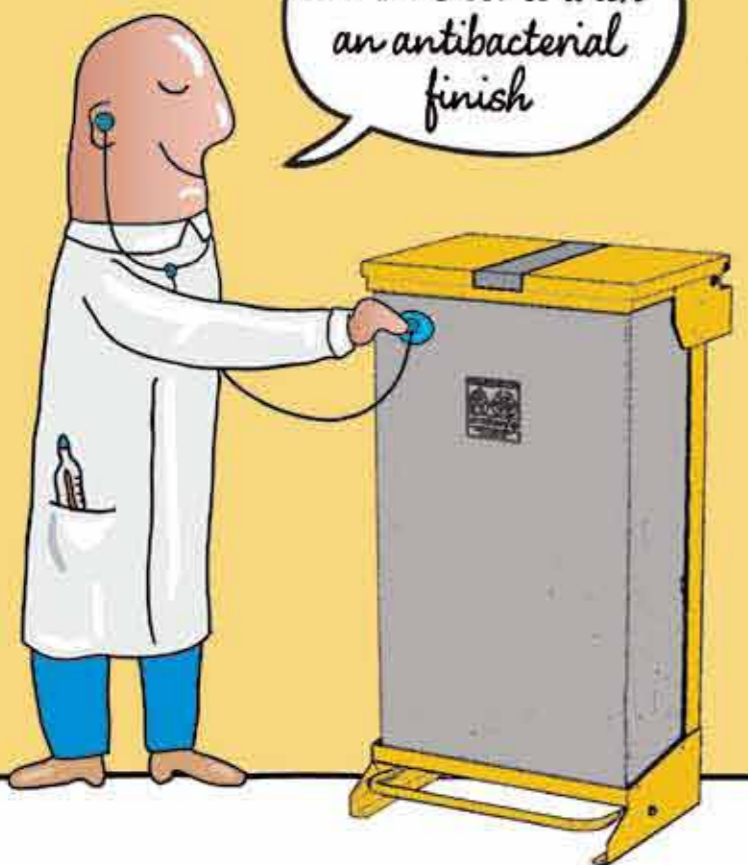

Wybone sackholders have the same genetic makeup, all additional parts are universal. From large to small, one part fits all.

Just like any family our sackholders are strong, stable units. They all consist of a fully galvanised frame, which is corrosion resistant, and a plastisol body that conforms to class 'O' building regulations. Large feet provide the unit with a stable base. All our sackholders can be retro-fitted with soft close lids.

Over the generations our sackholders have evolved into a much more diverse range as a result of listening to our customers feedback on the product and how we can improve its operation.

All our sackholders have the same familial traits, they operate in the same way (press the pedal to lift the lid) and provide hands free operation. They are all manufactured in the same way to the same high standard.

Did you know that all our bins come with an antibacterial finish

Non Medical Bins/Hand Operated

Designed specifically where fire protection is required but without the need for cross infection control. Manufactured from British steel plastisol, the bodies feature an extremely high degree of corrosion resistance whilst also conforming to class 'O' Building Regulation on fire protection.

28 Litre Hand Operated RFG/4/28HO

With its slimline design this 28 litre capacity unit is ideal for paper towels and small items of waste where space is at a premium

Keep your waste locked away securely

Collecting waste has always been a tricky problem within mental health/high security units.

Look no further with the introduction of 'High Security' sackholders. The unit differs from our standard sackholders by having the following features:

Ordering is easy, simply quote the correct code for the bin you would like...

- 28 Litre - RFG/4/28 SB
- 42 Litre - RFG/7 SB
- 80 Litre - RFG/21 SB
- 98 Litre - RFG/31 SB

Additional securing holes to mount to floor or wall.

Fully bolted construction i.e. no loose items & still available in 28, 42, 80 litres.

Lockable frame which is bolted in place.

Safe in the knowledge that Wybone are looking out for your needs!

Conforms to all fire regulations & HTM0501

Covered lid operating rod.

Ambience, we've got it by the bin load...

The Wybone Ambience Sackholder Range offers a wide choice of sackholders in a variety of subtle, calming, tranquil colours. Specially designed to compliment the interior design schemes of different healthcare

areas including public, patient waiting, patient departure, patient consultation and therapeutic care environments. Enhancing the health care environment whilst supporting the maintenance of cleanliness.

Domestic & Clinical Storage Units

Our storage products can offer safety, security and peace of mind to our clients. Designed as general storage units or as a means to maintain segregation of waste, which is waiting for collection. For example outside doctors surgeries where waste is collected on an infrequent basis.

The colour coded lid identifies recognised clinical or domestic waste.

Easy Clean RSA/15S
Textured Finish RSA/15T

A useful storage solution. Ideal for storing clinical and domestic waste, with a number of additional options available to tailor your bin to your specific requirements.

ADDITIONAL OPTIONS	
Budget Security Lock LKB/RH	Gas Struts GSLF
Triangular Security Lock LKT	Castors (per set) RSA/CB
Hasp and Staple UH/SL	Lettering (per letter)
Handles /H	

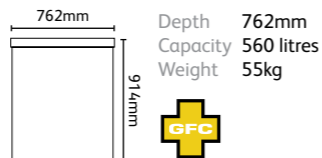

Storage Unit

Easy Clean RSA/20S
Textured Finish RSA/20T

A useful storage solution. Ideal for storing clinical and domestic waste, with a number of additional options available to tailor your bin to your specific requirements.

ADDITIONAL OPTIONS	
Budget Security Lock LKB/RH	Gas Struts GSLF
Triangular Security Lock LKT	Castors (per set) RSA/CB
Hasp and Staple UH/SL	Lettering (per letter)
Handles /H	

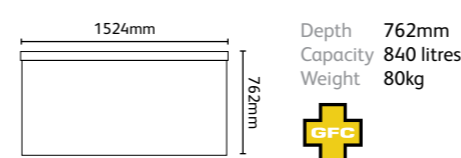

Storage Unit

Easy Clean Single RSA/30S
Textured Finish Single RSA/30T
Easy Clean Double RSA/30SLD2
Textured Finish Double RSA/30TLD2

A great solution for many types of storage. Available in single or double lid options.

ADDITIONAL OPTIONS	
Budget Security Lock LKB/RH	Gas Struts GSLF
Triangular Security Lock LKT	Castors (per set) RSA/CB
Hasp and Staple UH/SL	Lettering (per letter)
Handles /H	

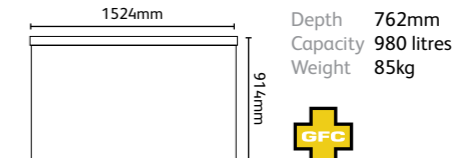

Storage Unit

Easy Clean Single RSA/35S
Textured Finish Single RSA/35T
Easy Clean Double RSA/35SLD2
Textured Finish Double RSA/35TLD2

A great solution for many types of storage. Available in single or double lid options.

ADDITIONAL OPTIONS	
Budget Security Lock LKB/RH	Gas Struts GSLF
Triangular Security Lock LKT	Castors (per set) RSA/CB
Hasp and Staple UH/SL	Lettering (per letter)
Handles /H	

Domestic & Clinical Storage Units

Our storage products have the benefit of being able to resist high impacts, are corrosion resistant, resist the extremes of temperature, can have an easy clean finish which is ideal for clinical waste and have high vandal resistant qualities.

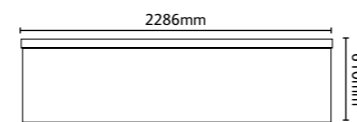

Storage Unit

Easy Clean Double RSA/45SLD2
 Textured Finish Double RSA/45TLD2
 Easy Clean Treble RSA/45SLD3
 Textured Finish Double RSA/45TLD3

Large Storage Containers - available in two or three segment options.

ADDITIONAL OPTIONS

Budget Security Lock LKB/RH
 Triangular Security Lock LKT
 Hasp and Staple UH/SL
 Handles /H
 Gas Struts GSLF
 Castors (per set) RSA/CB
 Lettering (per letter)

Depth 762mm
 Capacity 1260 litres
 Weight 120kg

Storage Unit

General Waste WSG/12DW

A useful storage solution. Ideal for storing domestic waste, with a number of additional options available to tailor your bin to your specific requirements.

ADDITIONAL OPTIONS

Budget Security Lock LKB/RH
 Triangular Security Lock LKT
 Hasp and Staple UH/SL
 Handles /H
 Gas Struts GSLF
 Castors (per set) RSA/CB
 Lettering (per letter)

940mm
 Depth 559mm
 Capacity 336 litres
 Weight 43kg

Storage Unit

Clinical Waste WSG/12CW

A useful storage solution. Ideal for storing clinical waste, with a number of additional options available to tailor your bin to your specific requirements.

ADDITIONAL OPTIONS

Budget Security Lock LKB/RH
 Triangular Security Lock LKT
 Hasp and Staple UH/SL
 Handles /H
 Gas Struts GSLF
 Castors (per set) RSA/CB
 Lettering (per letter)

Wybone Sackholder's meet all current legislation

All Wybone's sackholders are manufactured and constructed to meet all current legislation.

With the added security of Anti-bacterial coatings, fire retardancy and class 'O' fire rated plastisol bodies, you can be assured that Wybone sackholders are of the highest quality available.

Designed, manufactured and tested solely within the UK we can tailor all our units to meet your specific requirements. Offering cleanliness, waste management, and fire safety we believe Wybone sackholders have the winning combination.

On large orders,
we will upon
request remove all
packaging, which we
will recycle!

Pack it.

Environmental and Social Policy

Environmental Policy

As a major manufacturer of environmental products, Wybone are fully aware of the impacts which industry, commerce and other sectors have upon the environment at local, national and international level.

As part of its commitment to enhancing and protecting the environment, Wybone has in place an environmental policy that reflects these beliefs and values.

Our policy outlines the ways in which we try to achieve our environmental goals. As a company, we shall:

- Clearly understand our environmental impacts and where we can influence them.
- Comply with relevant national legislation as required. Where no regulation exists, we shall set the standards in line with good environmental practice.
- Reduce energy and water consumption. Increase recycling and re-use schemes. Buy from suppliers who have sound environmental policies.
- Buy products whose environmental impacts are low (commensurate with acceptable performance).

Product Manufacture: Due to our policy of manufacturing the majority of products in house, emissions generated by the importation of products is therefore minimised.

Product Design: Our products are designed with longevity in mind and therefore reduce the impact upon the environment by having to constantly replace. We also offer a full refurbishment service and spare parts in a bid to keep our products performing in line with their design criteria.

Manufacturing Process: Raw materials are used for renewable sources from suppliers located as near as possible to our Head Office. All decisions regarding machinery include their carbon footprint which will be reduced wherever possible.

Transport & Distribution: Wybone ensure the most efficient forms of transport is used, using piggyback loading wherever possible. Wybone's own vehicles are all Euro 3 compliant.

Procurement: Company stationery and consumables are used which have a high recycled content. Wybone bulk-buy to reduce excessive packaging waste and purchase refilled, remanufactured or re-inked printers and ribbon consumables where possible.

Administration: Stationery and consumables are recycled through recognised routes. Computers and electronic equipment used has a "power down" feature to reduce energy demands. Low energy light fittings and lamps are used wherever possible. Rechargeable batteries are used in preference to non-rechargeable.

Waste Management: Raw materials and secondary packaging are reused and recycled wherever possible. Post manufactured material is recycled into new products or in other applications.

Staff Effects: As a company, we are also conscious of the effect that our staff have on the environment, so encourage schemes such as employee car sharing, as well as the installation of cycle facilities to allow employees to cycle to and from work.

Tree Planting Policy: With a view to conservation and bio-diversity, Wybone have planted 72 acres of woodland to assist with carbon emissions and therefore helping towards our aim of becoming carbon neutral, reducing the environmental impact of our business.

Social Policy

Wybone Limited recognises the organisational advantages from behaving ethically, with humanity, compassion and with consideration for the external environment. The best staff want to work for truly responsible and ethical employers, and Wybone is striving to ensure that it operates within an ethically responsible framework. We know that good staff make Wybone a good company.

The company is committed to investing in the local community, and this is the backdrop in every action taken, from recruitment and selection, to the charity events that are held on a regular basis. The companies stakeholders are at the heart of everything we do, and the company has a growing reputation for inward investing in the local area and community.

Training: When a member of staff joins the Wybone team, they are put through a rigorous induction programme, and given a good understanding of the company structure, the products that we make and the beliefs and philosophy behind the manufacture of the products. Having employed people for neighbouring villages in Barnsley, South Yorkshire for over 35 years, all positions are advertised in the local press, and the vast majority of staff live within a 3 mile radius of the factory. To date, the majority of factory staff are trained to at least NVQ Level 2 standard, or equivalent, and are given regular opportunities to develop their skills and knowledge in manufacturing industry specific areas. In addition, statutory training on subjects such as fork lift truck driving and first aid training are held on a quarterly basis, and all staff are given the opportunity to undertake further development.

Education: Within the office, the company encourages staff to undertake professional qualifications, with individuals working towards HND in Business Studies, CIMA qualifications and Master Degrees in Manufacturing. Staff are encouraged to cascade the knowledge they acquire internally to other staff once they return back to the workplace.

Communication: Communication is key within the business, and staff are kept informed of developments through regular team meetings and employee briefings. Training and development reviews are held on a regular basis, and staff are encouraged to develop themselves, therefore not only enhancing their interest in the role, but also continuing to build the skill base in the local community.

Local Community: We also have strong connections with the local educational establishments. We actively encourage student placements, helping students in the area to build a portfolio of skills to ensure they are "work ready", and this year to date Wybone have worked closely with the University of Huddersfield and Sheffield Hallam University.

Health and safety is crucial within a manufacturing environment, and we pride ourselves in ensuring that Wybone is a safe and hazard-free place to work. Our health and safety policy is a clear guideline to staff on how to operate safely within the factory and offices, and refresher training ensures staff remain knowledgeable and aware.

Fund Raising: Wybone's chosen charity is Weston Park Cancer Appeal in Sheffield, South Yorkshire. The most recent event held was the "Wear It Pink" day, where £1265 was raised by staff. Other events where money is raised are "Dress Down Fridays" and a Dragon Boat Race day, where staff work as part of a team rowing a boat in competition with other local firms. The Companies chosen charity is reviewed on an annual basis, and staff are given the opportunity to support a charity which is personally important to them.

Transparency: Before making decisions, managers within the company give consideration to transparency, and whether they would be happy to justify the decision publicly, the effect the decision will have on others and whether the decision would be deemed as fair, taking into consideration stakeholders. If the answer is yes, then it is likely that the decision made within the business is deemed as an ethical decision.

Terms and Conditions

Unless otherwise agreed, all sales made by Wybone Ltd are made on these conditions of sale. No variation of these conditions of sale or any terms supplied with any order form or other document provided by you will be binding on Wybone Ltd unless confirmed in writing by a director of Wybone Ltd. Wybone Ltd is referred to as "the company". (The headings are for the purpose of convenience and not interpretation.)

1. Terms of Trading: It is company policy that all customers (except government financed local, educational and health authorities) will be subject to payment on a Pro-Forma basis, which requires payment of goods up front before the order can be put into production.

Credit accounts are opened on the basis that all invoices must be paid within 28 days of the invoice date. Payments received for Pro-Forma invoices require 5 working days for payment to clear before despatch (although standard lead times will apply to all orders upon receipt of payment). However, the policy states that after 6 months of business on a Pro-Forma basis, any customer has the right to apply for a credit account (subject to trade references and a company credit check). Credit card facilities are an alternative option, enabling prompt process of payment by eliminating the 5 working days clearance required otherwise.

2. Goods: All goods are manufactured to order. As a result of continuing product development, the specification or design of goods may vary from that shown. You are responsible for deciding on the suitability of the goods offered for any particular purpose and for the consequences arising from any work we undertake on the goods at your request. Colours shown in the illustrations may vary slightly from the finished product due to the limitations of the four-colour printing used.

3. Prices: All prices in our catalogue and leaflets are in pound sterling, exclude VAT and delivery and were correct when published. Wybone Ltd reserves the right to change the advertised price before you place an order.

4. Settlement Terms: Strict 28 days from invoice date. Please note payment delays may result in your credit facility being withdrawn and action being taken under the Late Payment of Commercial Debts (Interest) Act 1998 at the rate that is relevant at the time. Notification will be given prior to action being taken. All invoice queries must be addressed in writing within 7 days of the invoice date.

5. Value Added Tax: List prices shown throughout our catalogue are exclusive of VAT. VAT is added to the invoice total including carriage charges, at rate current at date of invoicing.

6. Placing/Canceling Orders: Credit card orders can be accepted over the telephone but must be confirmed in writing within 5 days. If confirmation is not received we will assume that the order has been cancelled and cease production. All other orders must be made in writing (by post, fax or email). Confirmations should be clearly marked so that the duplication of orders does not take place. Cancellations cannot be accepted over the telephone, this must be instructed in writing. Where goods differ from standard products and are manufactured to suit your particular requirements, Wybone Ltd cannot accept cancellation of your order and will only accept return of the goods if they are defective and returned within three days of delivery to you.

7. Export Orders: Pro-forma and Ex-Works basis.

8. Title of Goods: The seller has a responsibility for insuring the goods until the time when title passes to the purchaser. Wybone Ltd accept orders on the basis that for so long as any amount to be paid for the goods remains owing to Wybone Ltd title to the goods will remain with Wybone Ltd and will not pass to you until Wybone Ltd has received payment in full including any interest due in accordance with paragraph 4.

9. Delivery: Delivery dates are given in good faith based on information available at the time an order is received. We cannot be held liable for any costs arising from late delivery. Goods shall be deemed to be delivered when handed to the carriers. Special deliveries can be arranged: i.e. AM delivery, Saturday deliveries, booking-in etc (please ask for details).

10. Damages: Risk of loss and damage to the goods shall pass to you upon delivery. All goods should be unpacked and checked upon receipt. Claims for damage to goods/short delivery must be noted at the time of delivery and notified to Wybone Ltd within three days of delivery to you. Claims for non-delivery of goods must be notified within seven days of the invoice date.

11. Return of Goods: Faulty goods will be accepted for return within three days of delivery to you if they are returned undamaged. Non-faulty goods will be accepted, entirely at Wybone Ltd's discretion, within one month of delivery to you provided that they are returned in perfect condition and have not been used (especially in hospitals due to the risk of cross infection). Non-faulty returns include those returned as faulty when no fault is found. Where we accept a non-faulty return you will be credited at the selling price less a handling charge of 15% of that price (to cover inspection and repackaging) plus inwards and outwards carriage. Any goods returned to Wybone Ltd which are not in the condition set out above will be rejected and returned to you at your cost. See paragraph 6 for information regarding special products.

12. Disputes: English law shall determine any disputes arising under these terms and conditions.

13. Quality Assurance: Wybone Ltd operate their own assurance system where systematic checks are carried out on all products at various stages of production and all goods thoroughly inspected prior to despatch.

14. Force Majeure: Should despatch or delivery of these products or part of them be delayed or prevented from any cause whatsoever beyond the Company's control or for a reason attributable to the customer or its customers or agents then at the Company's option, either the contract or any unfulfilled part thereof shall be terminated or the Company may extend the time for delivery until a reasonable period after such cause shall have ceased, in which event the customer shall be responsible for all storage and other costs incurred by the Company in connection therewith. Any such termination shall not prejudice the rights and obligations of either party, which have already then arisen or in respect of any part of the contract already completed.

IMPORTANT NOTE

All of the information contained in this catalogue is presented in good faith.

It should be appreciated that the information is, to the best of Wybone's knowledge and belief, true and accurate.

There is no guarantee as to its accuracy and no responsibility or liability, express or implied, can be accepted by Wybone Ltd for any problems which may arise as a result of any actions or decisions that may be taken, or by any other party that may be involved with specifying or using the product.

Since the conditions under which our materials and equipment may be used are beyond our control, recommendations are made without any form of warranty or guarantee.

It is the responsibility of the user to ensure that the material is fit for the purpose for which it has been selected.

This disclaimer does not affect your statutory rights.

Don't throw this catalogue in your bin if it's found you by accident! If you have no further use for it why not give it to someone who might be interested?

We also make:
bench seating
bollards
cycle racks
dog waste bins
grit bins
recycle bins
litter bins
smoking products
flower planters
water safety equipment
