FAST TURNROUND

PROTOTYPES

ISO 9001 CERTIFIED

Specialists in precision CNC turning of all types of plastic

What makes PTP so good at what we do? Because it's all we do. We only turn plastic and have done for many years. We have experienced operators, the very best equipment and are used to working to exacting standards. We bend over backwards to provide the best service and are flexible enough to respond to your little foibles. Our finished product may often be insignificant in your scheme of things, but to us, it is the most important. After all the difference is in the detail. You can rely on us to give every job the care and attention it deserves. So if you feel that you are drowning in a sea of mediocrity, you know who to call - PTP.
