- ISO 9001 CERTIFIED

Specialists in precision CNC turning of all types of plastic

Plastic turned parts may not float your boat, but to us they're our very reason for existence, our life blood, our ...well you get the picture. We're passionate about what we do and even if we do say ourselves, we're pretty good at it. We understand that however complex the machinery or equipment, it's only as good as the parts that it's made from. And often it's the most insignificant part that can bring everything grinding to a halt. You can rely on us to give every job the care and attention it deserves. So if you feel that you are drowning in a sea of mediocrity, who are you going to call - PTP.
