

SM15 2P

The cutting machine SM15 2P is suitable for a number of different cutting materials.

For instance PVC and fabric-reinforced hoses, flat ribbon cable, round cable, wire, stranded wire, steel ropes, hard and soft rubber, PVC profiles, PVC tubes, textiles, leather, materials from the medical field and much more can be cut to size with this machine. The cutting machine SM15 2P is driven by a DC-motor and works with a clutch-brake-combination and is controlled by a length counter. Like all cutting machines of the SM15 series, the SM15 2P can be combined with the pre-feeder ZG15 S or ZG200 B2 and the delivery tray AL
