

# PF250

The PF250 can be adapted to run with most cable processing systems. The powerful traction unit gives a simple and cost effective solution for removing cables from large and small reels.

Accompanied with the light sensor feed controller, this now provides a snatch free system that allows higher processing speeds with more controllability.

## **TECHNICAL DATA:**

**Power supply: 230V, single phase**

**Control: Frequency inverter**

**Speed: 0 – 3 m/s**

**Maximum cable diameter as system: 20mm**

**This system conforms with current CE guide lines.**
