

Easy Plus 400/600 Pedestrian Gate Closer

The Easy Plus Pedestrian Gate Closer is a fully featured commercial closer that provides consistent automatic closing without slamming. This gate closer has an adjustable hydraulically controlled closing speed and a choice of bracket fitting holes giving more control of the gate when closing.

Mounted on the gate surface, the Easy Plus Pedestrian Gate Closer is suitable for retrofitting to existing gates and for fitting to new gates at the time of fabrication.

Each gate closer kit includes a closer, brackets, fitting bar, and instructions. Fixings are not included as they vary according to the gate and post specification.

Ongoing maintenance is limited to regular inspection and lubrication.

Closing speed is adjusted by turning a hexagon headed screw located on one eyelet.

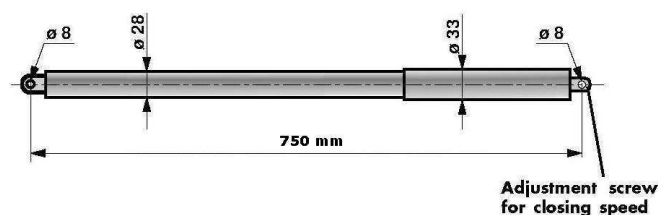

As with all gate closers of this type, it is advisable to fit a 'stop' *restricting the opening angle to avoid damage to the closer.

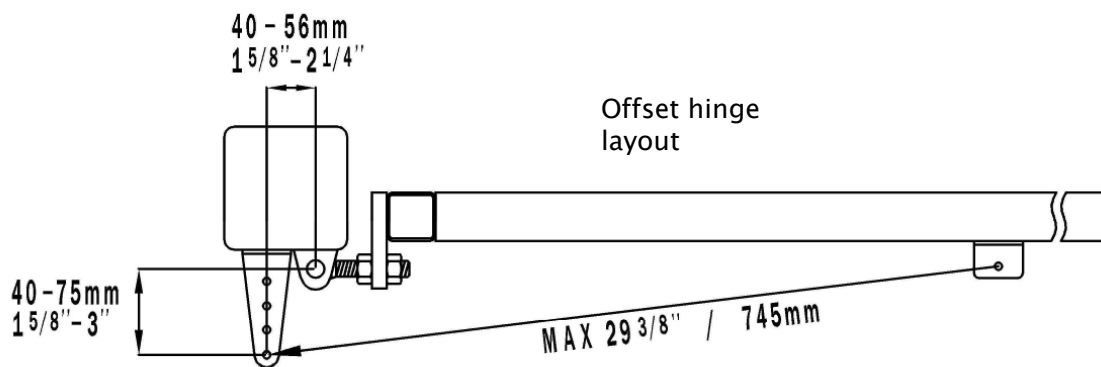

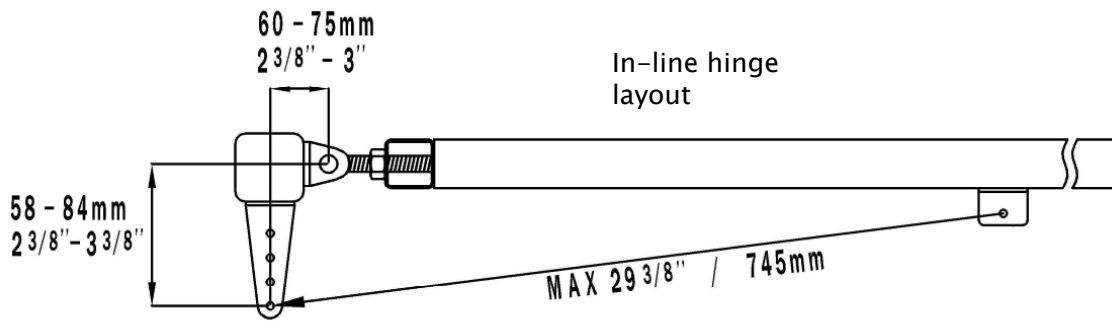

Quick overview:

Closer material	Steel
Closer colour	Silver
Closer finish	Bright zinc plate
Hinge arrangements	In-line & Offset
Opening angle	90° plus*
Gate size (400 model)	1.2m and 80kg
Gate size (600 model)	1.5m and 100kg
Types of gate materials	Metal or timber
Gate closing speed	Adjustable hydraulic
Opening hand forces	4-5 kg approx.
Bracket material	Steel
Bracket finish	Bright zinc plate
Closer end fittings	Eyelets
