

Keypad Gate Lock

With or without key override

The Keypad Gate Lock is a new & unique product which combines two marine grade keypads (back to back), with a special lock case with anti-ligature features and an adjustable latch bolt, designed to fit metal gates of various sizes and types.

This self locking system is designed to be as adaptable as possible. Being fully reversible, it is suitable for left and right-handed gates. The two telescopic fixing screws supplied, makes this keypad gate lock simple to fit to most metal gates.

The two keypads are preset to the same code, but can be simply and easily changed to different and separate combinations as many times as required.

Full fitting instructions and mounting templates are included.
