

Tru-Close Round Post Self-Closing Gate Hinge (Heavy Duty)

The TruClose Round Post Self-Closing Gate Hinge is a tough moulded hinge designed to fit a wide range of common round-posted gates and fences, where the frames and posts are the same diameter.

These hinges are ideal for fitting post diameters of 1 7/8" - 2" (48-50mm) or 2 7/8" (73mm) and gate frame diameters of 1 7/8" - 2" (48-50mm) or 2 7/8" (73mm).

Each hinge set (2 hinges) comes complete with shims/adaptors to fit different gate and post diameters, plus stainless steel fasteners. All the parts needed to complete the job.

TruClose inbuilt hinge adjustment gives consistent reliable performance. Allows you to set the hinge performance exactly as you want.

Moulded, reinforced polymer construction avoids rusting, sagging or staining.

Internal stainless steel spring mechanism avoids the need for unsightly spring closers and will not rust.

With UV-stabilised, self-lubricating materials, hinges give smooth operation without any lubrication. Only periodic inspection is required.

The special design which includes alignment legs, makes these hinges one of the easiest to install round post hinge sets available.

Ordering Overview

Model	Part Reference
H/D round post	GATEHINGE011

Technical Overview

Suitable for high traffic areas

Adjustable closing force/speed

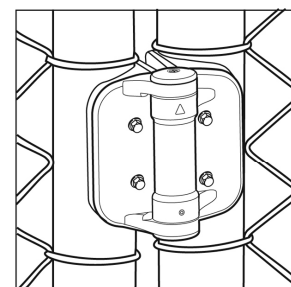

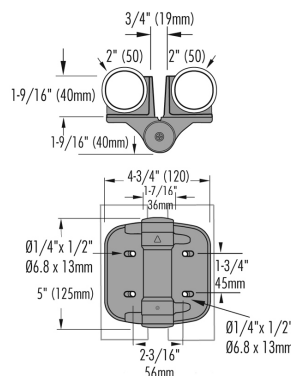

Fits 48-50 mm diameter posts and gates

Automatic close capacity 60 kg

Excess load capacity 317 kg

Ideal for use with chain link fences & gates

Each hinge set (2 hinges) includes stainless steel fasteners

Similar diameter posts
