

## Heavy Duty Self-Closing Gate Hinge for Metal Gates

A self-closing adjustable hinge for heavier or high traffic metal gates. Ideally suited for use in commercial applications, gated alleyways, childcare centres and many other commercial situations.

Its polymer body and stainless steel torsion spring ensures this hinge remains 100% rust-free for life. No unsightly stains, no binding and no gate sag.

With its slim body, this is the self-closing hinge to choose for hanging a gate with a metal frame. This hinge will snugly fit to a gate with a 40-50 mm box-section frame giving reliable self-closing function and durability.

A quick and easy adjustment feature allows for effortless adjustment and control of gate closing.

These hinges offer quick fit alignment legs for added strength and are only available in pairs.

For heavier gates, please contact us for further information.

### Technical overview:

Part number	GATEHINGE002
Gate material	Metal
Fixed gap	19 mm
Self-close weight	60 kg (max.)
Gate load	318 kg (max.)
Cycle rating	200,000
Colour	Black
