

## CYLINDERS & LIDS

### Protective Range

Cylinders provide an ideal internal core for reels of wire, cable and metal strip.

- Cylinders provide protection and reduce the potential of damage to your product.
- Wall thickness ranges from 1mm to 20mm.
- Collapsible cylinders available, minimising storage space, reducing transport and handling costs.

Fibre lids are used as end protection caps for reeled products such as floor covering and film based products.

Protecting reel ends prevents damage during transit and handling, reducing the costs incurred by damage.

- Bespoke to your specific requirements

# Fibre Drum Features

## PATTERN 3

Pattern 3 drums are suitable for packing powder, solid, semi-liquid and hazardous products. Lightweight and versatile, they will protect your product in the most cost effective manner.

Internal linings and barriers incorporated into the drum sidewall will provide enhanced protection for your products by extending shelf life and reducing the need for additional loose liners.

Drums printed with your company logo, brand names and product information will help to re-inforce your corporate image, as well as potentially reducing labelling costs.

UN approval for transportation of dangerous goods.

Low tare weight means savings on transport costs.

Fully recyclable and made from renewable fibre resources.

Electrogalvanised chimb band provides further impact strength.

By supplying drums loose, stretchwrapped or palletised, Fibrestar Drums will match your bespoke handling and delivery requirements.
