Mobile Access Platform MAP1

Falls from height still continue to be the main cause of death in the workplace and one of the main causes of serious injury. Around a third of all 'falls from height' accidents are as a result of a fall from a ladder.

Don't let a fall *shatter* your life, forget the ladder and introduce the Mobile Access Platform MAP1 into the workplace

designed for your workplace

It's NOT BIG but it is CLEVER

Mobile Access Platform MAP1 is an entirely unique concept in micro powered access:

- Designed to compliment its working environment, to be unobtrusive and blend with its surroundings
- Enjoy the benefits of a product engineered for your workplace and not building sites
- Almost silent in operation
- Lightweight and exceptionally manoeuvrable
- Will not damage or mark floor surfaces, walls and doors
- Compact, suited to narrow aisles and confined areas
- Operators quickly feel comfortable and confident when using MAP1

Mobile Access Platform MAP1 is designed for your workplace and workforce:

- Minimal floor loading, almost silent in operation, compact size, exceptional manoeuvrability and smart unobtrusive appearance make MAP1 your ideal partner for all overhead applications in all public access environments.
- Shop dressing and signage, cleaning, maintenance and repair, archives and stock picking, duct work and piping, decorating, lighting and electrical to name a few.

Why Choose Mobile Access Platform MAP1 ?

- MAP1 has been specifically designed for public access environments such as shops, offices, hospitals and hotels. Unlike products intended for the building site, MAP1 is not big, bulky and awkward to move.
- MAP1 works with it's environment, it is safe and simple to operate. The emphasis is on good unobtrusive design. Air requires no set up time and compliments the workplace without disruption to the working day.
- MAP1 is the culmination of over 40 years' design and manufacturing experience and is supplied with a three years' parts and labour warranty.
- Your entire workforce will quickly feel comfortable and confident using MAP1, it is operator friendly and very intuitive.
- MAP1 is fully compliant with all relevant regulations and legislation, CE marked and supplied complete with operation decals and instructions, certification and manual.
