

Tough □ hard wearing tools for demanding applications

The Hanolex™ range of hand tools enables anyone to fit almost any type of eyelet in to almost any type of material. Available for most sizes of eyelet our high quality professional tools include hole cutters, eyelet setters and soft faced hammers.

Custom Toolage

As well as our standard toolage we can also produce custom toolage for special or intricate applications, please call our sales team to discuss this further.

Simple two step process

① Cut the hole

Use the hole or “wad” cutter to create the correct size hole in your material, the wad cutter is hit against a hard (non-metal) surface using a soft faced hammer.

② Set the eyelet

Strike the setting tool with the hammer to roll the barrel of the eyelet back around itself gripping the material, JOB DONE!
