## Flow Control Engineering Insulation Jackets for Hogfors Fig 34500TR Ball Valves

CeeVee Ltd provides flexible, removable and reusable Insulation jackets designed to fit the Hogfors Fig 34500TR range of ball valves, which allow for easy accessibility for inspection or replacement. Each jacket has two layers of heat & flame resistant cloth enclosing a layer of insulating material, complete with fire retardant Velcro™ & string fasteners for simple installation and removability.

We offer a variety of options depending upon the application e.g. Temperature; internal/external surroundings.

### Advantages of using Insulation Jackets

- Immediate cost savings
- Energy saving
- Totally reusable
- Quick, easy fitting/removal
- High/Low temperature applications
- Water resistant
- Protection from hot surfaces
- Protection against frost damage.

### Example (In photographs above)

25mm valve for a District heating system containing water at 130°C. Internal application.

Aluminised foil cloth  
With 25mm infill  
& Fire Retardant Velcro & cord fastenings.
