

DISABLED ACCESS SPECIALISTS

Alta Lifts sets the standard for vertical platform lifts. The lifts have exceptional aesthetics, comply with the most stringent safety requirements and can be tailored to suit individual applications.

Safety

Safety is the primary concern within the design of our lifts. We have adopted the highest European standard of product safety certification during the development of the Alta lifts and we exceed the requirements of the Machinery Directive and the Building Regulations.

Aesthetics

The clean lines and striking appearance of our shaft means a lift can become a feature of a room.

The lift platform is a semi-enclosed car, with either glazed or coloured panels and a decorative, illuminated ceiling. The integrated drive system means no separate motor room is needed, producing a small overall footprint. Our unique automatic door opener is concealed within the frame, removing the need for an obtrusive external unit. Both shaft and car can either be glazed or supplied with panels finished in any colour of your choice.

DISABLED ACCESS SPECIALISTS

Flexible

We pride ourselves on our ability to be flexible and provide a solution where others cannot. We offer bespoke panel work, such as a company brand presented as an engraving or a backlit panel. If a finish is not on the list as standard, we can adopt the one you need. Alta Lifts offers unrivalled attention to detail, in both production and service.

Internal or external, free standing or within a shaft, with or without a small pit, any height up to 14m: it's your choice. You are just one call away to finding the lift you need.

Service

From your first call through to the final installation, we are happy to help you every step of the way. We will survey your site for you, ensuring that the installation is carried out quickly and efficiently. All of our lifts are manufactured by us, in the UK, which means that we can react quickly to an urgent demand. We offer an after sales service that includes maintenance and servicing as well as a rapid supply of spare components.

Specification

Rated Load	400kg
Speed	Soft start up to 0.15m/s
Travel	up to 14m
Ground floor access	50mm pit or ramp where necessary
