

ALPHA LIGHTING

Industrial and Commercial Lighting Specialists

Industrial (Low Energy)

Over the past 25 years, Alpha Lighting's engineers have installed bespoke lighting systems in many shops, offices, factories and workshops. Our experience, coupled with our extensive product knowledge, put us at the forefront of the commercial lighting industry in the North East of England.

Since the implementation of the Government's CRC (Carbon Reduction Commitment), it is now essential for all businesses to ensure they have low energy and efficient lighting – and who wouldn't welcome a reduction in their energy bills of between 40% and 65%?.

At Alpha, we have hand-picked the best commercial lighting solutions currently available in order to achieve the perfect balance between providing the correct working environment, reducing CO2 emissions and offering low maintenance, low energy lighting solutions to suit all budgets. All our lighting systems are designed to offer huge savings on current fluorescent or tungsten lighting costs.

We are able to provide our energy efficient lighting solutions throughout mainland UK and can arrange for an advisor to visit your factory, office, shop or any other type of business premises for a consultation. We provide Payback Schedules and are willing to visit your site to discuss any requirements at your convenience.
