GRP Finial Gallery

We manufacture a large range of GRP finials which are produced as standard in a Lead effect grey or Verdigris Copper finish, although we can produce them in virtually any BS colour where required, often at no extra cost.

Each of our standard finial designs can be adapted to turn them in to a bespoke solution to suit your requirements with the addition of spikes, extra balls and base skirts.

Why GRP ?

GRP is a light weight but strong material which is colour impregnated and requires no painting.

GRP finial in Lead effect, Verdigris copper effect or special gold finish.

Standard lead effect finial on top of our 'Winchester' style cupola.

'Baroque' finial in a lead effect finish.

Standard lead effect finial on top of our 'Oxford' style cupola.

'Sphere' finial in a lead effect finish.

'Globe' finial in a Verdigris finish.

Lead effect GRP 'Pepper Pot' finial.

Fixing Kits

We offer a simple quick fixing solution to suit virtually any roof design.

Produced in stainless steel and brass, they are designed to last.

Standard GRP Finial Sizes

Individual GRP Finial sizes

Copper Finial Gallery

All of our standard copper finials are made from 100% copper with a brass support tube, which has been formed and then either welded or soldered. We recommend leaving the finials to age naturally however we do offer a painted and Verdigris patina finish as well.

Standard copper finial in a natural finish and a Verdigris finish.

Square tapered cone copper finial in a natural finish and a Verdigris finish.

Round tapered cone copper finial in a natural finish and a Verdigris finish.

Depending on the installation a fixing kit may be required. Details of these are on page 8.

All of our finial prices include delivery to UK mainland.

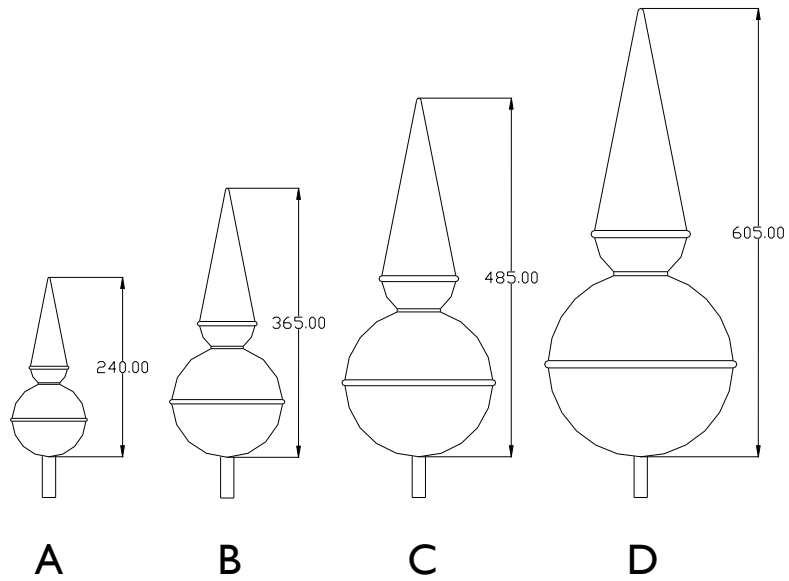

Natural and Verdigris Copper finish 'Air Rod' finials fitted to cupolas.

Copper 'Air Rod' finial available in a natural copper finish or a Verdigris finish as standard.

- 1 x Hexagonal Todd piece

Bespoke GRP Finial Gallery

Our standard range of GRP finials can be adapted to suit customers requirements, matching them to a preferred colour or adding a skirt so they can be used to cap a roof. Alternatively we can manufacture a totally bespoke finial to the customers own design.

Bespoke Copper Finial Gallery

Replicas of original finials or bespoke designs can be manufactured in copper. We can also adapt our standard copper finials by adding additional balls, scrolls, base skirts or ridge capping.

Bespoke Metal Finial Gallery

We produce custom finials to suit individual designs, such as crosses for churches, crescent moons for mosques or even internally illuminated colour changing finials. We can produce finials in Aluminium, Mild Steel, Stainless Steel and Copper.
