

The **Construction Risk Assessments Plus Volume II** software package has been developed to complement our existing **Construction Risk Assessments** software solutions. The package has been specifically designed to assist organisations working in the construction industry to comply with their duties under **UK Health & Safety Legislation**. The software offers over 160 pages of comprehensive guidance/information and **completed** risk assessments, as well as a **First Aid** risk assessment and a **Manual Handling** risk assessment template. All of the documentation has been professionally prepared by construction safety professionals. The package includes:

- General information and background data on why risk assessments are required and when, how and who should carry them out
- Blank risk assessment forms on which additional risk assessments can be prepared and kept
- Over 60 additional completed risk assessments for key construction and building related activities
- Each assessment assesses the risk, specifies control measures and where applicable provides reference to additional guidance information

Why do I need the software?

The **Construction Risk Assessments Plus Volume II** software package can help organisations to:

- Carry out and manage works more safely
- Win more and larger contracts
- Lower insurance premiums
- Demonstrate competence to main/principal contractors when tendering for work
- Pre-Qualify for CHAS & local authority work

The **Construction Risk Assessments Plus Volume II** software package therefore offers organisations a highly cost effective solution to assist in the daily management of health and safety issues.

Key Features Include:

- Completed Risk Assessments written by experienced construction safety professionals
- Comprehensive guidance on how to prepare a Risk Assessments
- Detailed Risk Assessment, First Aid Assessment and Manual Handling Assessment templates
- Easy to use graphical interface which requires no special training or knowledge to use
- Operates within the familiar Microsoft Office environment
- Fully customisable documents that can be edited and amended to reflect changes in legislation and organisational practices

Who is the software for?

The **Construction Risk Assessments Plus Volume II** software package has been specifically designed for all types of organisation, from the self-employed to multi-national organisations including:

- Builders/Civil Engineering Contractors
- Electricians/Plumbers/Mechanical Engineers
- Carpenters/Roofers/Plasterers/Brick Layers
- Groundworkers/Demolition Contractors
