CDM 2007 Design Safety Management & Risk Analysis Software

DESIGNERS CDM 2007 Compliance Kit
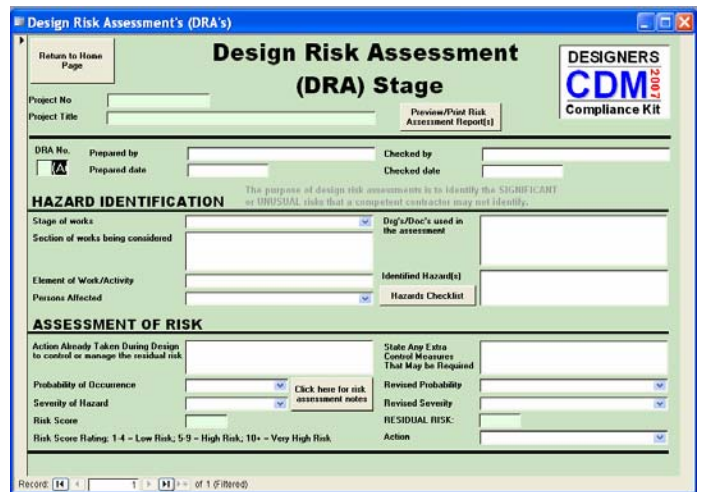

The Designers CDM Compliance Kit

has been specifically designed to assist designers (such as Architects, Engineers, Technicians, Specifiers, Surveyors) in complying with their duties under Regulation 13 of the Construction (Design and Management) Regulations 2007 (CDM). This includes assisting/prompting designers to:

➢ Make clients aware of their duties

➢ Give due regard to health and safety in design through the application of the principles of prevention and protection

➢ Cooperate with the CDM Co-ordinator, contractors, client and other designers

➢ Provide information about the health and safety risks, and hazards associated with their designs to those who may need it
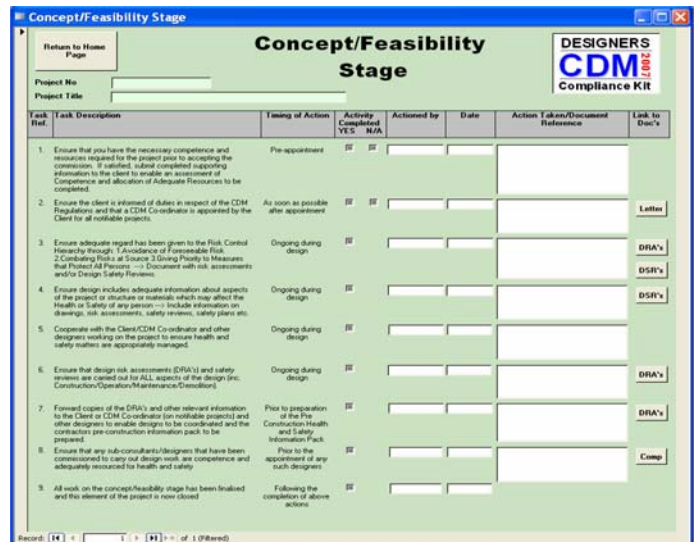

The Health and Safety Executive (HSE) have recently made statements about designers and the lack of understanding and appreciation of the role they have to play in the management and control of health and safety. The **Designers CDM 2007 Compliance Kit** can help designers to not only understand their role and duties, but also help to demonstrate how they have complied with the regulations, whilst providing standard documents and templates to assist in the design process.

The Designers CDM 2007 Compliance Kit's Key Features:

➢ Easy to use graphical interface which requires no special training or knowledge and operates within the familiar Microsoft Office environment

➢ Apply to multiple projects and is fully compliant with the CDM ACOP and Guidance

➢ Comprehensive automated Risk Assessment module with detailed hazards checklist and automated scoring system

➢ Produce Design Safety Reviews/Statements

➢ Produces full audit trail of actions taken and provides prompts for the user throughout each stage of the project

➢ Includes wide selection of customisable documents and templates to assist designers

➢ Project information is divided into convenient project stages

➢ Fully computerised and comprehensive solution to managing the design process with powerful search and find capabilities

Design Risk Assessment Module

Example Audit Record Sheet

System Requirements:

➢ Minimum processor - Pentium III or newer
➢ Recommended 128MB RAM or higher
➢ CD ROM drive
➢ Operating system Windows 98/2000/XP
➢ Microsoft Office 2000/2002/2003/XP (Word & Access)
➢ Adobe Acrobat Reader
