Safety Services Direct.com

# CDM 2007 Audit & Risk Management Software

The Clients CDM Compliance Kit has been specifically designed to assist clients and client's agents in complying with their duties under the Construction (Design and Management) Regulations 2007 (CDM). This includes assisting/ prompting clients to:

➢ Appoint a competent and adequately resourced CDM Co-ordinator and Designer(s)

➢ Provide adequate information on health and safety to the CDM Co-ordinator

➢ Appoint a competent Principal Contractor

➢ Ensure a suitable Construction Phase Health & Safety Plan has been prepared before construction works commence

➢ Ensure the Health & Safety File is received, maintained & available to those requiring it
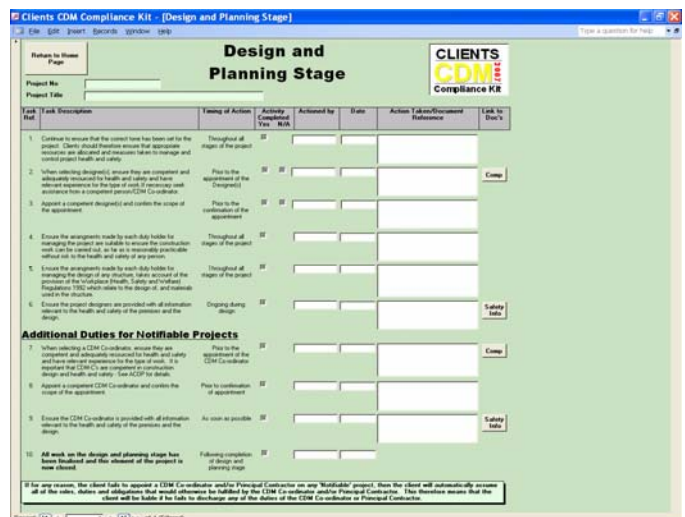

Under CDM, the Approved Code of Practice and Guidance states that **'Clients set the tone for the project and have overall control'**. However, given that around **50% of all successful prosecutions under CDM have been against Clients**, it is apparent that many clients are unclear of their role and duties under CDM and given the additional duties under CDM 2007, this situation is likely to worsen.

The Clients CDM Compliance Kit's Key Features:

➢ Easy to use graphical interface which requires no special training or knowledge and operates within the familiar Microsoft Office environment

➢ Fully compliant with the CDM ACOP and Guidance, and applicable to multiple projects

➢ Comprehensive automated Risk Assessment & scoring system with detailed hazards checklist

➢ Produce Design Safety Reviews/Statements

➢ Produces full audit trail of actions taken and provides prompts throughout each project stage

➢ Includes wide selection of customisable documents and templates to assist clients

➢ Project information is divided into convenient project stages

➢ Fully computerised and comprehensive solution to managing projects with powerful search and find capabilities
